## Late-breaking news on HP personal computer products

---

The **Vectra Office Entry Pack** provides a software solution to meet basic office software requirements of users who need to work with financial, marketing or other data, whether on site, in a client's office, on the road, or at home.

The Entry Software Pack (HP 68306F) includes Lotus 1-2-3, Executive MemoMaker, and AdvanceLink. To get the software on 3 1/2-inch discs, which are required for use on the new HP Portable Vectra CS PC, order HP 68306F and Option #003.

You save 20 percent by buying the Vectra Office Entry Software Pack instead of purchasing the software packages individually.

Additionally, for users who require a more complete office software solution, there are the Vectra Office Professional (HP 68300F) and Vectra Office Assistant Software (HP 68301F) Packs. These packs contain 5 1/4-inch media only. Note: The media are available on 3 1/2-inch discs if you purchase the software packages individually.

The Vectra Office Professional Pack includes:

Graphics Gallery -- NEW version 2.0  
Executive MemoMaker  
Lotus 1-2-3  
Executive CardManager  
AdvanceMail  
AdvanceLink

The Vectra Office Assistant Pack includes:

Graphics Gallery -- NEW version 2.0  
AdvanceWrite PLUS -- NEW  
Lotus 1-2-3  
Executive CardManager  
AdvanceMail  
AdvanceLink

To order one of the three packs, contact your HP sales representative.

\* \* \*

**Picture Perfect** (HP 45462A) and **Diagraph** (HP 45463A) for the HP Touchscreen PC have been discontinued by HP due to low demand.

Following standard HP policy, support and media replacement will be available for five years from beginning October 1, 1987. Discontinued software replacement media exchange kits are available from DMK. To order a kit follow the ordering instructions in the article "Software Exchange Kits" in the green pages of this issue. In the U.S., the Picture Perfect exchange kit is HP product number 45462-63001; the Diagraph exchange kit is HP 45463-63001.

You can continue to purchase Picture Perfect and Diagraph directly from the manufacturer, Computer Support Corporation:

Computer Support Corporation  
Attn: Gail McCannon  
2215 Midway Road  
Carrollton, Texas 75006 USA  
(214) 661-8960

\* \* \*

Due to popular demand, the **Lotus 1-2-3 Release 2.01 Upgrade** for the **HP Touchscreen PC** has been extended. HP will continue to offer this upgrade as long as there is sufficient demand.

The **1-2-3 Release 2.01 Upgrade** for the **HP Touchscreen PC (HP 45566-63004)** can be ordered from the **Hewlett-Packard Direct Marketing Division (DMK)** by mail order only. To order follow the general ordering instructions in the article "Software Exchange Kits" in the green pages of this issue.

If you plan to upgrade in excess of 100 units, or have participated in **Lotus Development Corporation's Major Account Upgrade Program** for the **Vectra/IBM** version of **1-2-3**, please contact your **HP sales representative**.

\* \* \*

*For U.S. and Canada only:*

**ReadRight Optical Character Recognition (OCR) software (HP 88400A)** for the **HP ScanJet** is now available. **ReadRight Software** allows the **HP ScanJet** to read and convert text into **ASCII** characters for future editing.

**ReadRight Software** uses a type of **OCR technology** called **Feature Extraction**. **Feature Extraction** determines the characters by analyzing the features of the character. For example, an "H" is viewed as two vertical bars with an interconnecting horizontal bar.

Once the text is stored, it can be transferred to a word processor for further editing. **ReadRight Software** will format the scanned text directly into **ASCII**, **WordStar**, and **WordPerfect** formats. Through a memory resident program included with **ReadRight**, it will convert an **ASCII** image of the scanned text to the following word processing formats:

Symphony  
WordStar 2000  
PFS: Write  
PC-Write  
MultiMate  
Microsoft Word  
DisplayWrite  
CanonWriter

**ReadRight** recognizes a variety of fonts and point sizes. Fonts can be mixed on a page, paragraph, or line. The user need not tell the system what font it is reading. **ReadRight** can read a range of point sizes and pitches (6-12 points and 10-15 pitch). **ReadRight** supports the following fonts:

Mono-Spaced

-----

Courier  
Pica  
Elite  
Prestige Pica  
Prestige Elite  
Letter Gothic  
OCR-B  
Bookface Academic  
Prestige Renown/Style

Proportional Spaced

-----

Bold  
Cubic  
Roman/Madeleine  
Title  
Modern  
Thesis  
Theme  
Arcadia  
Gothic/Victory  
Majestic

ReadRight does not read documents which fall into the following categories:

- Typeset documents (books, magazines, brochures)
- Documents printed on a very open dot matrix printer (Epson printer)
- Poor photocopies

For more information, contact your dealer or HP sales office. ReadRight is not available through HP's Direct Marketing Division (DMK) or their phone lines.

\* \* \*

The non-U.S. (localized) language versions of the Graphics Gallery/Vectra software products have been enhanced to integrate with PageMaker from Aldus Corporation.

Specifically, we have added a new TIFF (Tag Image File Format) driver to all of the Gallery products, enabling users to create high-resolution raster files for use in PageMaker. A PC Paintbrush driver has also been added to allow integration of Graphics Gallery/Vectra with Ventura Publisher from Xerox Corporation.

All foreign language versions of Graphics Gallery/Vectra products--Drawing Gallery, Charting Gallery and the Gallery Collection-- are now shipping with these capabilities.

If you purchased Graphics Gallery without the enhancements, you can order a single Gallery update disc to add these capabilities to your Gallery software. The language versions available are French, German, Dutch, Italian, Danish, and Finnish.

To obtain a copy of the Gallery update disc, please contact your HP sales representative.

\* \* \*

On October 1, 1987 **AdvanceWrite I and II** began a six month plan for discontinuance which will be effective April 1, 1988. The new **AdvanceWrite Plus** is the replacement product and upgrade programs are in place. See your dealer or **HP sales representative** for the details.

\* \* \*

A new Hewlett-Packard font cartridge, the **HP 92290S1**, is now available. This font cartridge was developed exclusively for use with the **LaserJet Series II** and **LaserJet 2000 printers**.

Below are some of the features:

- A full family of 10-point, 12-pitch Courier fonts allows 80 columns on A4 paper, useful for European customers.
- A 12-point Courier italic completes the Courier family that is internal to the printer.
- The PC-8 character set or IBM-US (as designated on the **LaserJet Series II** printer) allows the user to directly map all characters found on the **IBM PC** or compatibles to the **LaserJet Series II** printer.
- With the correct software, the **LaserJet Series II** and **LaserJet 2000** printers can create all the **HP-supported ISO** symbol sets.

The **HP LaserJet Series II** and **LaserJet 2000** printers understand the unique symbol mapping of the PC-8 character set. It is important to note that the **LaserJet**, **LaserJet PLUS** and **LaserJet 500 PLUS** printers do not understand this mapping. In other words, the **HP 92290S1** is compatible only with the **LaserJet Series II** and **LaserJet 2000** printers.

For further information, contact your dealer or **HP sales office**.

\* \* \*

To use Windows on an **HP Vectra CS PC**, Microsoft Windows for the **HP Vectra PC** version **B.02.00** (available first quarter 1988) is required.

Microsoft Windows version **A.01.03 (HP 45954A)** is not supported or recommended for use on the **HP Vectra CS PC**. Using this version can result in the loss of data.

If you have purchased the incorrect version of Windows, contact your local **HP sales office**. Unopened packages may be returned for a complete refund.

\* \* \*

In the article "**Vectra: Softfont Limits with the HPPCL.DRV Driver**" on page 19 of Issue 23, the last bullet item should read "**PageMaker with PCL/LaserJet (HPPCL.DRV) limitations:**" rather than "**PCL/LaserJet (HPPCL.DRV) version 1.02 limitations:**"

\* \* \*

## Welcome to the *HP PC Communicator*

---

The *HP PC Communicator* is the heart of HP's support program for personal computers and software. The magazine contains programming techniques, information on software updates, notes on using applications, and corrections for manuals. The *HP PC Communicator* also lists known software problems and their solutions, and introduces new members of the HP PC family.

---

### Subscriptions and Back Issues

In many countries, you can order subscriptions and back issues by telephone. For details, see the "Ordering *HP PC Communicator* Subscriptions" and "Ordering Back Issues" articles in the Current Information insert.

---

### Becoming a Contributor

Much of the material in this issue was submitted by users and HP field-support people. If you'd like to contribute an article, program, question, or suggestion, please send it to us at the following address:

Editor, *HP PC Communicator*  
Hewlett-Packard Company  
P.O. Box 486  
Sunnyvale, CA 94086 U.S.A.

By submitting information, you agree that the material will not be considered confidential, and that HP may use, copy, edit, modify, publish, or sell it without any liability and without any obligation to you or to anyone else. If we publish your contribution in the *HP PC Communicator*, your name will appear on the by-line. If you'd like us to return the material you submit, please enclose a stamped, self-addressed envelope with it.

We look forward to sharing your ideas with HP PC users throughout the world.

### **Current Information**

---

*(See page Current Information-3 for Table of Contents)*

What is the difference between Compact Save and Quick Save in Executive Card Manager (ECM)? Basically, the Quick Save option is used to make a duplicate copy of your original cardfile. This is a quick method to backup your cardfile. The Compact Save option is used to make a copy of the cards in your cardfile with which you are currently working. For example, let's say your original cardfile contained 150 cards. If you delete 25 cards in the cardfile, you will now have 125 cards in your cardfile, but the number of bytes in your cardfile is still the same. This is due to the fact that the actual cardfile is not "cleaned" up until you do a Compact Save of the cardfile. Therefore, the Compact Save can be used to free up space on your hard disc by cleaning up your cardfiles.

The Compact Save option also comes in handy when working with worksets. For example, let's say you have a cardfile that contains 100 cards, and you create a workset of that cardfile which consists of 50 cards. If you use the Quick Save option to save your workset, you will get a new cardfile that contains all of your original 100 cards, but you can only see 50 of them. On the other hand, if you perform a Compact Save on the workset, you will get a new cardfile that contains only those 50 cards that were contained in your workset. As you can see, if you save a lot of worksets with the Quick Save option, you can use a lot of disk space unnecessarily.

So, use the Quick Save option when you want a copy of the entire cardfile, and the Compact Save option, when you want a copy of the active cards in your cardfile.

---

Here are some tips on the use of PageMaker 1.0a.

**1. LaserJet Series II font cartridge selection.**

The 1.05 PCL driver lists the various memory-size configurations of the Series II in the menu. When you select a Series II configuration, the heading above the font cartridge menu changes to "2 max." How do you actually select two cartridges in that menu? There is no obvious way to drag or select with the mouse.

To select the second font, you hold down the Shift key while clicking.

**2. Printer/font configuration included in saved document.**

A document saved in PageMaker retains printer/font configuration information

- Printer type (PCL or PostScript)
- The port to which the printer is connected
- The fonts available

PageMaker will ask you if it should convert the document—this is a one-step process—sometimes lengthy. This can be irritating in system-to-system data transfer if the systems are not configured exactly the same. Of course, if the new system does not have the same fonts, you will need to use the Text Tool and the Type Menu to select from the fonts now available to you.

**3. Accented characters**

With PCL drivers before version 1.05, the width-table information for accented characters is misinterpreted. Text with many accented characters—such as in a French- or Spanish-language document—will print out with an improperly aligned right-hand margin if the paragraph is right-justified. Since this effect is a small cumulative error across each individual line, text with only a few accented characters per line will not be noticeably misaligned.

This is fixed in PCL driver version 1.05—which ships with 1.0a version of PageMaker.

---

□

---

Use caution when using disc optimizer programs with Lotus 1-2-3 installed on your hard disc system.

There are some disc optimizer programs which cause problems with programs protected by Softguard (Lotus 1-2-3 and Symphony use this form of copy protection). Disc optimizer programs are designed to help clean up your hard disc by copying all files into contiguous blocks.

However, Softguard writes hidden files to your hard disc when you use the "Install 1-2-3 to a Hard Disk" option within the Lotus 1-2-3 Install program. When these files are copied over, they are purposely fragmented on your hard disc. In other words, the files are placed in noncontiguous blocks. If you use a disc optimizer, it will place these files in contiguous blocks and the Lotus program will no longer see the key that you have copied down to the hard drive. In essence, you have corrupted the key.

To avoid problems, make sure that you remove the key (or Softguard protection) by going into Lotus Install, the Advanced options menu and choosing the "Remove 1-2-3 from a Hard Disk," *before* you run a disc optimizer program.

---

□

The use of HP-IB peripheral devices with the HP Vectra PC requires special HP-IB hardware and software.

**Hardware** The hardware requirement is an HP-IB Interface card. Installed in one of the expansion slots, one card is all that is necessary for any HP-IB device to be used on the Vectra. The switches must be set to the following settings regardless of what peripherals and software you will be using:  
Switches 1, 2 and 5 set to the UP/ON position  
Switches 3 and 4 set to the DOWN/OFF position

**Software** Two software libraries are available for supporting two groups of peripherals—one for disc and tape drives and another for instruments, printers, and plotters.

Group	Software	Peripherals
Drives	Disc/Tape Command Library	HP-IB disc & tape drives, e.g. 9134, 9153B, 9122, 9142
Instruments	Instruments, Printer & Plotter Command Library	HP-IB Printers and Plotters, e.g. HP 2225A, 7550A.

■ **Disc/Tape Command Library**

This library contains software which allows access to most HP-IB disc and tape drives. (Specifically not supported are the HP 9133D, 9133L, 9153A, 9133H, 9133X, 9133XV, and 9121. However, some people have reported using the HP 9133D, 9133L, 9153A, and 9133H.) The software below is included in the Disc/Tape Command Library.

HPDISC.SYS and HPTAPE.SYS are device drivers that must be copied to the system disc and specified in your CONFIG.SYS configuration file. One or both of the following commands must be included as the last statement in your CONFIG.SYS file.

```
DEVICE = C:\DISKTAPE\HPDISC.SYS
DEVICE = C:\DISKTAPE\HPTAPE.SYS
```

These assume that the software has been loaded to the DISKTAPE subdirectory of the C: drive. The HPTAPE driver needs to be installed only if an HP 9142 will be used.

HPTAPE is used to initialize tape cartridges and to perform image copies between the tape and internal hard-disks.

HPFORMAT is used to format all HP-IB connected discs. This is the only program that can be used to format the HP-IB connected discs. If you attempt to use the MS-DOS FORMAT command to format your 3.5-inch flexible disc drive, you will be asked to confirm. If you respond "Yes" it will re-format your internal hard-disc, and all information on it will be lost.

HPTEST can be used to perform tests on the HP-IB card, cable, and peripherals in the event that problems occur.

■ **Instruments, Printer and Plotter Command Library**

This library contains programs which allow access to HP-IB instruments, printers, and plotters.

HPIB.SYS: A Vectra can support up to three logical devices, LPT1, LPT2, and LPT3. Any printer or plotter (HP-IB, Centronix, Serial, or network) must be associated with one of these devices. For HP-IB printers or plotters, this association is accomplished by adding the following line to your CONFIG.SYS configuration file:

```
DEVICE = C:\HPIB\HPIB.SYS LPT1 = 305
```

```
Card address as set by the card / | | |
switches specified above.      | |
```

```
Must be 0 / |
```

```
HP-IB address of the device to be / |
```

used for this logical device.

This assumes the software has been loaded into the HP-IB subdirectory of the C: drive.

HPIBMODE is a program used dynamically to add or change logical device assignments. A line adding the HPIB.SYS device to the CONFIG.SYS file as shown in the example above must first be installed. Then to add an additional printer or plotter or to change an association, use an MS-DOS command like the following:

```
HPIBMODE LPT2 = 301
```

The 301 has the same meaning as in the CONFIG.SYS entry. In this case device LPT2 has been associated with the printer with HP-IB address 1.

This command may be placed in your AUTOEXEC.BAT file, or may be issued manually.

---

**To Order**

Software for either group of peripherals can be ordered with the HP-IB Interface card or separately if you already have the card.

<b>HP Product</b>	<b>Description</b>
88500A	Disc/Tape Command Library with HP-IB Interface cable and card
88500B	Disc/Tape Command Library alone
82990A	Instruments, Printer and Plotter Command Library with HP-IB Interface cable and card
82990E	Instruments, Printer & Plotter Command Library alone

To order contact your dealer or HP sales representative.

---

A question I often receive is "How do you get the inkjet Printers to skip the page perforation when printing from HPDESKMANAGER or using log bottom when you do not have control over margins." With dot matrix printers you can turn on "Perforation Skip" by sending the control code Esc&11L (Escape, &, lowercase l, #1, uppercase L).

Text is printed without regard to the actual perforation. Top of form determines the exact position of the perforation skip area. Six lines are skipped leaving a top and bottom margin of three lines, again, depending on where "TOP OF FORM" was determined when you turned on the printer or pressed the "TOP OF FORM" button. (For more details on printer control codes refer to your printer manual.)

You can send this escape sequence to your printer with a word processor that will allow you to embed escape sequences within the document, for example, in Executive MemoMaker for the HP 150 or IBM/Vectra PC, and MemoMaker for the Portable Plus. Create a string of characters with the proper control code (Escape, &, lowercase l, #1, uppercase L):

[&11L

When you press the ESC key in MemoMaker/ Executive MemoMaker it will appear as a left bracket in inverse video. Be sure to save this string of characters as a DOCUMENT FILE. For this example we'll save the file as PERFSKIP.

Next you will need to add the following line to your AUTOEXEC.BAT files so that it will send the control codes to your printer (the PRN device in this example):

TYPE PERFSKIP >PRN

To check to see if "AUTOEXEC.BAT" exists on your system you can type from the MS-DOS prompt:

TYPE x:AUTOEXEC.BAT (where x is the root directory of your system start-up drive)

This command will type out the contents of the AUTOEXEC.BAT file or report that the file does not exist.

You can modify AUTOEXEC.BAT as an ASCII file in MemoMaker/Executive MemoMaker or if AUTOEXEC.BAT does not exist, following are two methods to create it.

- Create it as an ASCII MemoMaker/Executive MemoMaker file with the name AUTOEXEC.BAT.
- Create it in MS-DOS with the following procedure (<rtn> refers to the Return key on the Portable Plus and HP 150 or the ENTER key on the Vectra/IBM PC):  
Turn "CAPS LOCK" ON  
Type: COPY CON AUTOEXEC.BAT <rtn>  
Type: TYPE PERFSKIP >PRN <rtn>  
Press: the CTRL and the Z keys simultaneously  
This will copy what you type on the console (screen display) to a file named AUTOEXEC.BAT.

Whenever you start your system, it looks for the AUTOEXEC.BAT file and performs any of the instructions you have in that file.

If you do not want to turn perforation skip on each time you start your system, you can also send the control codes to the printer at any time by issuing the same MS-DOS command:

```
TYPE PERFSKIP >PRN
```

Note: Your printer must be on when you start your system or when you are sending control codes to it.

Note: Before using a PC application that sends control codes of its own for top and bottom margin (for example MemoMaker/Executive MemoMaker), you will need to turn perforation skip off with the control code Esc&l0L (Escape, &, lowercase l, #0, uppercase L), OR . . . simply turn the printer off and on again. Otherwise you will get unexpected margins and pagebreaks.

LaserJet Series II fonts can be selected from an LCD menu display on the front panel of the LaserJet II as well as by sending escape sequences from the software application. The following help sheet may help make selection from the LCD menu display easier because you may not need to refer to the manual.

**To Change Fonts**

Select a font from the cartridges available.

■ **To insert a cartridge:**

1. Take LaserJet OFFLINE (Press [ONLINE] button so ONLINE light = off).
2. Remove or insert font cartridge from slots located beneath paper input tray.
3. Put LaserJet back ONLINE (Press [ONLINE] button so ONLINE light = on).

Note: When a cartridge is removed while the LaserJet is turned on the LaserJet will change back to INTERNAL fonts if that drawer (left or right) was the current font selection. The previous settings will be applied to the INTERNAL fonts resulting in unpredictable output.

To return to internal default settings, refer to the following instructions or reset (see "To make changes" below).

■ **To make your font selection:**

1. Take LaserJet OFFLINE.

Display reads

COPIES = XX

MANUAL FEED OFF\*

FONT SOURCE = I = Internal Fonts

R = Right Cartridge  
L = Left Cartridge  
S = Softfonts

When available

Press [+] or [-] button to change the selection  
Press [ENTER] once to make selection

FONT NUMBER = xx

Press [+] or [-] button to change the selection  
Press [ENTER] once to make selection

FORM = 60 LINES\*

00 READY

2. Press [MENU] button

Once

Again

Again

Again

Again

Again

\*Indicates current selection

■ **To make changes take effect:**

1. Make sure you have cycled through the menu and the display reads **00 READY**
2. Press [CONTINUE/RESET] button—hold until display reads “07 RESET” (3 seconds +) and then release

Note: Font selection escape sequences included in your document or otherwise sent from your software application can override these selections or, when combined, can cause unexpected results.

The amber “ON LINE” light should be on and you can continue printing.

---

In a multiple user environment you can anticipate an enormous waste of paper if each person presses the “PRINT FONTS” button on the LaserJet II for the list that provides the “FONT NUMBER” that it needs to make their font selection. By taking the time once to print out the list for each font cartridge you will be able to make a handy reference for the user and save a tree at the same time.

Inserting each cartridge and pressing “Print Fonts” will provide you with a list of the appropriate FONT ID number but you may want to do some cutting and pasting from these lists:

First, each list will also provide you with the Internal Font Selections; these can be trimmed off each list except for one list for selecting internal fonts numbers.

Second, the FONT ID on the list will indicate L (Left) or R (Right) depending in which slot the cartridge was inserted when you made the “PRINT FONTS” selection. You should edit this to say “L(ef) or R(ight).”

Put these font selections in a binder with the help sheet and an index and you’ll have a useful aid for using the LaserJet Series II.

Using GWBasic to configure COMx: ports on your system may conflict with your ThinLAN/StarLAN software. The following is a description of the problem, the solution, and a detailed explanation of what happens when the problem occurs.

**Problem:** When using GWBasic to configure COMx: ports, GWBasic changes the interrupt mask (flags to show active/inactive interrupts) for INT 3 and INT 4 (INT 3 is the default used by ThinLAN/StarLAN). Once the masks are changed, the network transport is disabled and can no longer receive packets and the system locks.

**Solution:** Configure the ThinLAN or StarLAN interface cards at INT 5 or 7 if GWBasic (or other applications that configure COMx) will be used on the machine.

**Detailed Explanation:** GWBasic, in setting COMx ports, does not look at the pre-existing 8259 interrupt mask for INT 3 and INT 4. In the case sent to our support staff, configuring COM1 set INT 4 to on and shut off INT 3, which happens to be used by the ThinLAN/StarLAN Transport. This makes it impossible for the workstation to receive any packets, effectively removing the network functionality until the workstation software is reloaded (after rebooting). Since the ThinLAN/StarLAN transport can no longer receive inbound packets, any network activity that expects a remote response will cause the problems described below.

The differences in the drivers between StarLAN and ThinLAN make it appear that only StarLAN is affected by this. StarLAN's symptoms are to lock the machine if connections existed prior to using GWBasic to configure the COMx: port, or if no connections existed, to lock upon attempting a connection.

ThinLAN will not lock. However, upon exiting GWBasic with pre-existing connections, ThinLAN must time-out before the DOS prompt appears. Attempting connections will also cause a timeout with the error condition "Server not responding" due to the inability to handle inbound packets.

This difference between StarLAN and ThinLAN is due to driver implementation and is inconsequential to the final results. In either case, the user effectively is without a network until reboot/reload.

Note: While this problem was found with GWBasic, other applications that configure the COMx: ports may cause similar events.

Also note that stealing the interrupt can potentially cause other problems for existing connections. For example, existing virtual circuits are polled by the server. With the interrupt masked off, the workstation will not "see" the polling and the server will disconnect on the assumption the workstation is no longer present.

The work-around for all this is: If you are running programs that interact with the COM ports and you see these symptoms, set the ThinLAN/StarLAN networking card interrupt to 5 or 7 to ensure that transport functionality is unaffected.

---

## Introducing a New Family of HP Office Workstation Solutions

Betsy Thomas

---

HP has a new family of office workstation solutions to meet the different types of computing requirements, from workgroup communications to distributed data processing to individual office applications.

The new HP workstations work well within an integrated systems environment. The HP 700 family of terminals sets the standard for performance with an HP 3000 system. All HP desktop personal computers come standard with terminal emulation software for links to host-based resources such as printers and databases.

Each HP workstation is built on industry standards, for true compatibility throughout your office environment. And as new industry standards in software, video and networking emerge, such as Microsoft's OS/2 operating system, the HP office workstation will take advantage of them.

---

### HP 700 Terminals

The new HP 700 family of terminals is designed with a high-quality 14-inch screen, a choice of phosphor screen colors and ergonomic details, such as excellent character resolution and a built-in tilt and swivel mechanism. The HP 700 terminal family fits into computing environments based on Hewlett-Packard, Digital Equipment Corporation, IBM and general-purpose systems.

---

### HP Portable Vectra CS PC

An HP Portable Vectra CS personal computer offers IBM PC/XT software compatibility and the functionality of a desktop PC in a portable package. With a full-sized keyboard, built-in disc drives and a detachable PC-sized LCD screen, an HP Portable Vectra PC ensures that you do not sacrifice functionality for portability. The HP Portable Vectra CS PC is compatible with the other members of the HP Vectra personal computer family. With a wealth of choices, the HP Vectra desktop personal computers meet a broad range of computing needs, and a range of budgets.

<b>HP Vectra Family</b>	<p>The HP Vectra PC family now includes the following desktop systems.</p> <p>The <b>HP Vectra CS PC</b> delivers IBM PC/XT compatibility.</p> <p>The <b>HP Vectra ES PC</b>, based on an 8 MHz Intel 80286 processor, provides IBM PC/AT compatibility.</p> <p>The <b>HP Vectra ES/12 PC</b>, with its 12 MHz Intel 80286 processor, offers IBM PC/AT compatibility to demanding business users.</p> <p>The <b>HP Vectra RS/16 PC</b>, based on the 16 MHz Intel 80386 processor, combines powerful performance with flexibility due to its floor-mount package.</p> <p>The <b>HP Vectra RS/20 PC</b> provides premium performance and expandability, with a 20 MHz Intel 80386 processor and a floor-mount design.</p>
<b>Preassembled HP Vectra Systems</b>	<p>HP's Vectra PCs can be ordered as preassembled HP Vectra systems. Two solution systems are available: the <b>HP Vectra StarLAN PC</b>, with all the elements to link to a StarLAN network, and the <b>HP Vectra Publisher PC</b> which equips you with all you need to create professional documents through desktop publishing. You can choose from a complete line of HP accessories, including memory, mass storage and display systems, to enhance your HP Vectra PC's performance.</p>
<b>State-of-the-Art Design</b>	<p>From keyboard design to system assembly, Hewlett-Packard engineers the latest advances into all its office workstations, and HP tests each component thoroughly.</p>
<b>Custom Support</b>	<p>You can choose from a variety of support plans or design your own.</p>
	<p>For more information, contact your dealer or HP sales office.</p>

---

Hewlett-Packard's Vectra CS Personal Computer, the entry-level member of the new HP Vectra PC family provides exceptional value for basic computing needs.

With an 8086-compatible processor, 640 Kbytes of standard memory, built-in serial and parallel ports, and a fast memory data path (16-bit memory bus), the HP Vectra CS PC is a solid choice for core office applications such as word processing and spreadsheets.

To protect your investment, the HP Vectra CS PC offers flexibility for growth. Seven expansion slots leave plenty of room for accessories. Three mass storage shelves accommodate up to two flexible disc drives and a hard disc drive.

The power of the HP Vectra CS PC extends beyond the desktop. It can be partnered with HP's minicomputers and networks. Every system includes HP Terminal Program software, which allows you to tap the resources of a host computer, such as large data bases, high-speed printers, and electronic mail. You can access information from the HP minicomputer or send messages quickly and conveniently to other people in your information network.

For more information contact your dealer or HP sales office.

---

	Four new accessory products are available which add power and flexibility to the HP Vectra CS personal computer. These products expand the HP Vectra CS PC's memory, provide fast access to large amounts of data, speed up numeric calculations, and make it easy to connect an HP Mouse and other input devices.
<b>Expanded Memory Card</b>	The HP Vectra CS PC comes with 640 Kbytes of main memory, the maximum directly addressable under MS-DOS. The HP Vectra CS Expanded Memory Card adds up to two megabytes of expanded memory that can be used in several ways. With software that supports the Lotus/Intel/Microsoft Expanded Memory Specification (LIM EMS), such as Lotus 1-2-3 or Ashton-Tate's Framework II, you will be able to manipulate large spreadsheets and data bases quickly and easily. Some of the memory can also serve as an "electronic disc drive" or RAM disc. Many leading programs, including Microsoft Windows, will run more quickly with a RAM disc.
<b>20 Mbyte Hard Disc Subsystem</b>	Installing a hard disc greatly increases the data storage speed and capacity of a personal computer. This hard disc subsystem, with a 65 millisecond average access time and 2:1 interleave factor, enables the Vectra CS to access data faster than most systems in its class, including the IBM PS/2 Model 30.
<b>Numeric Coprocessor</b>	Many applications that do extensive calculations, such as spreadsheets and graphics programs, will run noticeably faster with the Vectra CS Numeric Coprocessor. The Intel 8087 coprocessor chip plugs into a special socket on the Vectra CS PC processor board.
<b>HP-HIL Accessory Interface</b>	A mouse or tablet makes programs such as the HP Gallery Collection and Microsoft Windows even easier to use. This plug-in card allows HP-HIL pointing devices, including the HP Mouse, HP Graphics Tablet, and HP Touch to be connected to the Vectra CS PC. A special HP-HIL connector is provided, so the standard serial port is left free for a printer, plotter, or communications link.

<b>Ordering Information</b>	<b>HP Product Number</b>	<b>Description</b>
	D1171A	Vectra CS HP-HIL Accessory Interface*
	D1172A	Vectra CS Numeric Coprocessor
	D1173A	Vectra CS 20 Mbyte Hard Disc Subsystem
	D1174A	Vectra CS Expanded Memory Card
	Option 001	1 Mbyte installed
	Option 002	2 Mbytes installed

To order contact your dealer or HP sales office.

\*The Vectra CS-HP-HIL Accessory Interface will be available in the first quarter of 1988.

## Introducing the HP Vectra ES and ES/12 Personal Computers

Miles Mikasa

---

### HP's New 80286-Based AT Compatibles

The HP Vectra ES and ES/12 Personal Computers are HP's new 80286-based AT-compatible offerings. The HP Vectra ES PC is an enhanced replacement for the HP Vectra PC. The HP Vectra ES/12 PC is a superior AT-class machine and offers excellent price/performance.

The HP Vectra ES and ES/12 PCs are designed to satisfy your high productivity needs. The HP Vectra ES PC, with its 8 MHz Intel 80286 microprocessor, easily handles most spreadsheet, data base, sophisticated word processing, and data collection applications. The HP Vectra ES/12 PC, with its 12 MHz Intel 80286 microprocessor, is excellent for more challenging applications, such as complex business graphics, large spreadsheets and data bases, or desktop publishing.

---

### Optional HP Vectra 8 MHz 80287 Numeric Coprocessor

If you use applications supporting the Intel 80287 math coprocessor, then you will enjoy dramatic speed improvements with the optional HP Vectra 8 MHz 80287 Numeric Coprocessor. The optional HP Vectra ES Expanded Memory Card can give you up to 8 Mbytes of memory (running at 8 MHz in the ES, 12 MHz in the ES/12) for substantially increased performance with the many applications supporting the Lotus-Intel-Microsoft Expanded Memory Specification 4.0 (LIM EMS 4.0). LIM EMS 4.0 is the industry-standard way of allowing applications to break the 640 Kbyte memory limitation of MS-DOS 3.x, where x denotes part of the version number. Supported applications include Lotus 1-2-3 Release 2.0, Framework II, Microsoft Windows, and many others.

---

For more information, contact your dealer or HP sales office.

---

[ ]

All HP Vectra ES and ES/12 PCs include a new four function controller board which provides a floppy controller, serial and parallel ports and a hard disc controller. The hard disc controller cable and data cable are included standard as well.

If you purchase an HP Vectra ES or ES/12 PC without a hard disc drive (HP Vectra ES Model 10 or Vectra ES/12 Model 10), and later want to upgrade your system, you need only buy the hard disc drive mechanism rather than purchase the complete disc subsystem: HP now offers the existing 20 Mbyte HP 45896M and 40 Mbyte HP 45897M IBM AT-compatible hard disc products structured with mechanisms only.

These new products are subsets of the existing HP 45896A and 45897B Vectra Internal Hard Disc Subsystems. (The 45896A and 45897B include a hard disc controller because there was not one included with the original HP Vectra PC system. Users with original HP Vectra PCs should order these products when they upgrade their systems.) The table below highlights the features of the new products as well as how they differ from the existing hard disc subsystems.

Features	20MB Drive Mechanism Product Number 45896M	40MB Drive Mechanism Product Number 45897M
Form Factor	Half-height, 5.25-inch	Half-height, 5.25-inch
Formatted Capacity	21.2 Megabytes	42.8 Megabytes
Typical Average Seek Time (Disc Performance Spec)	65 Milliseconds	28 Milliseconds
Shock, Operating Non-operating	10G's 40G's	10G's 40G's
MTBF (Mean Time Between Failure- Reliability Spec)	20,000 Power On Hours	20,000 Power On Hours
What's Included (How Similar to the 45896A and 45897B).	Hard Disc Mechanism, Installation Manual	Hard Disc Mechanism, Installation Manual
What's Not Included* (How Different from the 45896A and 45897B).	No Controller Card or Cables are Included with 45896M	No Controller Card, Cables or Multivoluming Utility are Included with the 45897M

\*These pieces come standard with the New Vectra CS, ES and RS series PCs, except Multivoluming which comes standard with HP's MS-DOS 3.2.

For more information contact your dealer or HP sales office.

Hewlett-Packard will offer a 3.5-inch internal flexible disc drive during the fourth quarter of 1987 that can be used as a second flexible drive on HP Vectra CS, ES, ES/12, RS/16, and RS/20 PCs.

The 3.5-inch drive is the ideal second flexible disc drive for your Vectra Family PC. With both 3.5-inch and 5.25-inch drives installed in your system, you can standardize on a flexible disc technology while at the same time maintaining a bridge to the other technology. And both drives mount inside the HP Vectra PC without sacrificing an expansion slot or desk space.

Vectra PC Family users will now be able to enjoy the benefits this drive and media have brought to HP Touchscreen, HP Portable, and IBM PS/2 PC users. The drive was built to work with the compact 3.5-inch flexible disc media. This disc is more reliable than the traditional 5.25-inch flexible disc and is being used by an increasing number of vendors. It comes enclosed in a hard plastic shell with a metal shutter that covers the actual media. The shutter opens and closes only when the disc is inserted into the drive. The media revolves on a special steel hub for more accurate centering. All this gives the media unequaled protection and reliability.

This new product (HP 45813A) will allow you to share 3.5-inch discs between HP Vectra and HP Touchscreen PCs that have HP 710 Kbyte double-sided flexible disc drives. It also will interchange 720 Kbyte discs with IBM XT, AT and PS/2 machines or 1.44 Mbyte discs with IBM PS/2s.

The product is intelligent; there are no special read/write commands for you to remember. All you need to do is insert a disc formatted to one of the three capacities described above and then read it and write to it—the system automatically adjusts to the format on the disc. And you can install the 3.5-inch drive into your HP Vectra PCs just as you would a standard 5.25-inch flexible disc drive. The standard HP Vectra PC floppy disc controller and cables support the product with no hardware changes required (except for HP Vectra CS PC systems which require simple jumper changes to the PC and to the drive itself). A Setup program and special software drivers are included that enable all HP Vectra PCs to take full advantage of the drive's multi-format capabilities.

To order contact your dealer or HP sales office.

<b>HP Product Number</b>	<b>Description</b>
45813A	Vectra 3.5-inch Internal Flexible Disk Drive. Includes 3.5-inch mechanism mounted on a 5.25-inch adapter tray (edge connectors and mounting rails "plug compatible" to existing floppy cables and mass storage cage), utility software and Setup program on a 5.25-inch flexible disc, and installation documentation.
45813A Option #001	MS-DOS 3.2, version B.01.01 to version B.01.02 Upgrade Kit. Includes MS-DOS 3.2 version B.01.02 discs on 5.25-inch media, and new effective pages of MS-DOS 3.2 manual. (Option #001 is available only when purchased with the drive.)

---

	<p>For many of today's software applications written for MS-DOS, 640 Kbytes of base memory just isn't enough. For this reason HP has made the HP Vectra ES Expanded Memory Card available for HP Vectra ES and ES/12 PC users.</p>
<b>Overcomes the 640 Kbyte Barrier</b>	<p>Hewlett-Packard's Vectra ES Expanded Memory Card overcomes the 640 Kbyte barrier so you can use software written to take advantage of the Lotus/Intel/Microsoft Expanded Memory Specification (LIM EMS), the industry standard for expanded memory. With expanded memory, you can store and manipulate large spreadsheets in a single file rather than splitting them into multiple files when the 640 Kbyte limit has been reached. In addition, expanded memory will increase the performance of the HP Vectra PC system when switching between multiple applications under Microsoft Windows.</p>
<b>Uses LIM EMS 4.0 Memory Specification</b>	<p>While fully compatible with the LIM EMS, revision 3.2, popularized by Intel's Above™ Board, the HP Vectra ES Expanded Memory Card goes beyond this standard by using the recently introduced LIM EMS 4.0 memory specification.</p> <p>The new specification runs all of the software supported by LIM 3.2 including Lotus 1-2-3, Symphony, Framework, and dBase III. In addition, LIM EMS 4.0 features up to 16 times as many memory swap areas as cards supporting the old specification and features the ability to swap executable code (computer instructions) as well as data. The benefits of LIM EMS 4.0 are most notable in applications supporting these features, such as Microsoft Windows 2.0 for the HP Vectra PC (HP 45954B).</p>
<b>The Most Expandable Card</b>	<p>The HP Vectra ES Expanded Memory Card is the most expandable card available from any vendor. A single card can be loaded with up to 8 Mbytes of memory. This high memory capacity is achieved by using Single-In-Line Memory Modules (SIMMs), the latest in memory packaging technology. Because the card plugs into the HP Vectra ES Expanded Memory Slot, included exclusively on the HP Vectra ES and ES/12 PC motherboards, none of the seven standard accessory slots need to be used for memory expansion.</p>

---

**Among the Fastest of Cards**

The HP Vectra ES Expanded Memory Card is also among the fastest memory cards on the market today. When installed in the HP Vectra ES/12 PC, the HP Vectra ES Expanded Memory Card runs at 12MHz with one wait state, further enhancing the HP Vectra ES/12 PC's high speed performance.

---

**Like Two Cards in One**

Finally, the HP Vectra ES Expanded Memory Card is like having two memory cards in one. All or part of the Vectra ES Expanded Memory Card can be set up as extended memory for use in operating systems such as Xenix and Microsoft's OS/2.

---

**Ordering Information**

To order contact your dealer or HP sale office. Products below available first quarter 1988.

<b>HP Product Number</b>	<b>Description</b>
45944A	Vectra ES Expanded Memory Card
Option #001	2 Mbytes of memory installed standard
Option #002	4 Mbytes of memory installed standard
Option #003	8 Mbytes of memory installed standard
D1354A	2 Mbytes Expanded Memory Upgrade Kit

## New Math Coprocessor for Vectra ES and ES/12 PCs

Marc Lowe

---

A new Vectra 8 MHz 80287 Math Coprocessor (HP D1387A) is now available.

The new coprocessor is an Intel 80287 Math Coprocessor chip rated for 8 MHz operation. This coprocessor runs at 8 MHz in the Vectra ES and ES/12 PCs or 50 percent faster than the 5.33 MHz coprocessor used in the original Vectra PC.

The new coprocessor also serves as the replacement for the current Vectra PC coprocessor (5.33 MHz) (HP 45987A). When run in the original Vectra PC, the new coprocessor will run at 5.33 MHz. No settings need to be changed nor adjustments made.

The High Speed Numeric Coprocessor (8 MHz) (HP 82965A) will continue to be marketed for the original Vectra PC. This product includes an 8 MHz 80287 coprocessor chip mounted on a small circuit card with the electronics to allow 8 MHz operation on the original Vectra PC. The HP 82965A High Speed Numeric Coprocessor will not operate in the Vectra ES and ES/12 PCs since its electronics have been built into the Vectra ES and ES/12 PCs.

---

To order the HP D1387A or HP 82965A coprocessor, contact your dealer or HP sales office.

---

□

## HP Vectra ES and ES/12 PCs: What's Different?

Debbie Williams

	<p>HP's new Vectra ES and ES/12 PCs provide you with improvements in several key areas at no additional cost, including: enhanced performance, increased compatibility, greater expandability, and better integration into HP 3000 environments.</p>
<b>Enhanced Performance</b>	<p>The Vectra ES/12 has a 12 MHz 80286 processor, which gives the ES/12 a 50 percent boost in CPU performance over today's Vectra PC as well as the Vectra ES. The increased speed addresses the needs of Desktop Publishing and PC-CAD users.</p>
<b>Increased Compatibility</b>	<p>By addressing all known compatibility problems with the HP Vectra PC but still providing as much backwards compatibility as possible, the Vectra ES and ES/12 PCs give you flexibility to expand your personal computer needs without abandoning existing hardware and software. Key compatibility issues resolved with the new PCs include: support of third-party DIN keyboards, Novell 286 Network Software support, and operation of off-the-shelf, unmodified Xenix from SCO.</p> <p>The Vectra ES and ES/12 PCs also support the new 3.5-inch Internal Flexible Disc Drive, making them compatible with IBM's new 1.44 MByte format introduced on the PS/2 product line, as well as the older IBM 720 KByte format and HP's 710 KByte 150/Touchscreen format. This increased interchange compatibility gives you the flexibility to operate in mixed PC environments.</p>
<b>Greater Expandability</b>	<p>Although the original Vectra PC package size has not been increased, changes in configuration allow greater expandability with the Vectra ES and ES/12 PCs. By incorporating a serial and parallel port with a floppy and hard disc controller on all systems, an additional I/O slot is available. In addition, up to 8 MBytes of memory can be supported on the Vectra ES and ES/12 PCs without using any additional accessory slots. The new Expanded Memory Card fits into a special HP proprietary Expanded Memory Slot, and allows up to 8 MBytes of extended or Expanded Memory on a single board.</p>

---

**Cost Reductions**

The combination of incorporating VLSI (Very Large Scale Integration) and Surface Mount Technology onto the motherboards creates not only lower manufacturing costs, but provides increased reliability as well. Coupled with ongoing procurement efforts, this allows the Vectra ES and ES/12 to be priced the same as, or lower than, today's Vectra PC.

---

**Better Integration into HP 3000 Environments**

By including the HP Terminal Emulation Program with every Vectra ES and ES/12 PC kit, these systems are ideally suited for connectivity to HP mini-computers.

---

For more information contact your dealer or HP sales office.

---

The new HP line of Vectra Personal Computers use a new, industry-compatible keyboard called the "Enhanced HP Vectra PC Keyboard." It is the standard keyboard for the HP Vectra CS, ES, and RS families. The keyboard for the previous versions of Vectra PC used the HP-HIL interface; it will not be supported on the new line of Vectra PCs.

The Enhanced Vectra PC Keyboard has the same connector (DIN) and the same layout as the IBM Enhanced PC Keyboard. It is detachable, has 101 keys including 12 function keys, separate numeric and cursor keypads, and adjustable tilt. The full-travel, step-sculptured keys have quick response, tactile feedback and color-coded legends.

Some users need the previous Vectra PC Keyboard layout with the 103 keys, which has the 10 IBM-style function keys on the left and the 8 HP-style function keys on the top. For these users a transition keyboard is available which is supported only on the HP Vectra ES and Vectra ES/12 PCs. It has the 103-key layout, but has DIN connector and electronics.

You may need the older layout of the HP Vectra PC Keyboard/DIN if you:

- Have Vectra PCs, and want to avoid retraining with a new keyboard layout.
- Use HP Word. (HP Word will not support the new keyboard until Summer, 1988.)
- Use AdvanceWrite. (While AdvanceWrite PLUS will support the new keyboard, the new layout has fewer function keys than the old layout.)

We recommend the new preassembled HP Vectra CS, ES, and RS Personal Computers, which include the CPU (the computer), a PC Kit with User Manuals, and the Enhanced HP Vectra PC Keyboard. If you need the HP Vectra PC Keyboard/DIN however, order:

1. Vectra ES CPU **OR** Vectra ES/12 CPU,
2. Vectra ES PC Kit (D1350A #Axx), and
3. Vectra PC Keyboard/DIN (C1406A #Axx).

(#Axx, the country option, must be ordered to specify the language of the User Manuals and Keyboard).

For additional information on the new keyboards, please contact your dealer or HP sales representative.

On October 1, discontinuance of the original HP Vectra PC and selected accessories began. To smooth the transition, the discontinuance is being announced now and will occur in phases that will not be complete until April 1, 1988.

The HP Vectra PC has been replaced by the new HP Vectra ES and ES/12 PCs which became available October 1. The Vectra ES PC has the same performance as today's Vectra PC but offers greater expandability at a lower cost. The Vectra ES/12 PC has 50 percent faster performance and greater expandability for the same price as the current Vectra PC. See the article "HP Vectra ES and ES/12 PCs: What's Different?" elsewhere in this magazine for more details.

Listed below are the products that will be discontinued, their removal schedule and the replacement products. Even though some of today's Vectra models will remain available until January or April, 1988, all Vectra ES and ES/12 models became available on October 1, 1987.

<b>HP Product Number</b>	<b>Description</b>	<b>Replaced By</b>
<b>October 1, 1987</b>		
72458A 72459A	HP Vectra 3000 PC	All Vectra ES and ES/12 PCs now include HP Terminal Program for connection to HP 3000s
72496A 72497A	HP Vectra Publisher	Replaced by Vectra ES Publisher PC or Vectra ES/12 Publisher PC
72468A 72469A	HP Vectra StarLAN	Replaced by Vectra ES/12 StarLAN PC
45987A	Numeric Coprocessor (5.33 MHz Intel 80287)	Replaced by D1387A Intel 80287 High Speed Numeric Coprocessor: 8 MHz
<b>January 1, 1988</b>		
72425A	Vectra PC Model 25	Replaced by Vectra ES Model 10 or Vectra ES/12 Model 10
72450A	Vectra PC Model 50	Replaced by Vectra ES Model 20 or Vectra ES/12 Model 20
72460A	Vectra PC Model 60	Replaced by Vectra ES Model 40 or Vectra ES/12 Model 40
<b>April 1, 1988</b>		
72445A	Vectra PC Model 45	Replaced by Vectra ES Model 10 or Vectra ES/12 Model 10
45895A	IBM PC/AT-Compatible Hard Disc Controller Kit	
45896A	20 MByte, half-height, Hard Disc Subsystem	
45897B	40 MByte, half-height, Hard Disc Subsystem	
45971A	128 KByte Extended Memory Kit	

For additional information contact your dealer or HP sales office.

---

Due to the popularity of the HP Vectra 3000 PC (Model 58 and 59), all desktop and floor-mount members of HP's new Vectra PC family now include HP terminal emulation software to connect to the HP 3000. Like the HP Vectra 3000 PC, the new product structures include models that have factory-installed video cards and mass storage devices to retain the key HP Vectra 3000 PC benefits of ease-of-ordering and quick setup. Simply order the appropriate preconfigured SPU, appropriate monitor, and DOS—and you have the same key benefits that the HP Vectra 3000 PC provided. Note that the terminal emulation software does not include file transfer. Should you require this feature, include AdvanceLink in your order.

The preconfigured SPUs are available in a variety of flavors to give you a choice. With such a broad selection of workstations designed for HP 3000 environments, the HP Vectra 3000 PC has been discontinued and superseded by a new set of products. These new workstations add flexibility and have a greater price/performance range to satisfy a broad set of needs.

---

**Discontinued Products**

All versions of the HP Vectra 3000 PC (Model 58 and 59) have been discontinued.

---

**New Products**

HP's new Vectra PC family has been designed to connect easily to the HP 3000. Any five of the following systems can be configured as an HP Vectra 3000 PC. The five systems are:

- HP Vectra CS PC
- HP Vectra ES PC
- HP Vectra ES/12 PC
- HP Vectra RS/16 PC
- HP Vectra RS/20 PC

For ordering information, please refer to the following article "Ordering the New HP Vectra 3000 PC Configurations" also in this issue.

**Differences**

The following table compares the HP Vectra 3000 PC to an equivalent system configured from HP's new Vectra PC family. Like the Model 58 and 59, the Model 21 and 22 includes 640K RAM, a 20 MByte hard drive, a flexible drive, serial/parallel ports, a Multimode or EGA video card, the HP Terminal Program, and a keyboard.

	Vectra 3000 Model 58/59	Vectra CS Model 21/22	Vectra ES Model 21/22	Vectra ES/12 Model 21/22
SPU Speed	8 MHz	7.16 MHz	8 MHz	12 MHz
Communication	AdvanceLink	Terminal Program		
Video Adapter	Mono Plus or EGA	Multimode or EGA		
Display	Mono Included or EGA Included	Order 35731A Multimode or Order 35743A EGA		
DOS 3.2	Included	Order 45951B DOS 3.2		

The HP Vectra RS/16 and HP Vectra RS/20 can also be built-up to an HP Vectra 3000 PC configuration.

**AdvanceLink is Optional**

Since the HP Terminal Program is included with each system, AdvanceLink 68333F is optional and should be added to the order only when you require file transfer or command macro capabilities.

**To Order**

To order, contact your dealer or HP sales office.

The HP Vectra 3000 PC (Model 58 and 59) has been so positively received that HP terminal emulation is now included with all desktop and floor-mount HP Vectra PCs. The key benefits of ease-of-ordering and quick setup have been preserved because the new product structures include models that have factory-installed video cards and mass storage devices. Simply order the appropriate preconfigured SPU, appropriate monitor, and DOS—and you have the same key benefits that made the HP Vectra 3000 PC so popular. Note that the terminal emulation software does not include file transfer. Should you require this feature, add AdvanceLink to the order.

The HP Vectra 3000 PC has been replaced by configurations from the new Vectra PC family to give you a choice. You should now order the HP Vectra CS, ES, ES/12, RS/16, or RS/20 PC to best match your needs. Each system includes the new HP Terminal Program (without file transfer) to easily connect to the HP 3000.

---

**Four Simple  
Ordering Steps**

The additional choices now available have prompted us to update the ordering process. To order a complete system, three product numbers and a language option need to be specified. The three product numbers describe:

- Vectra SPU with a country option
- Video display
- Vectra operating system

**Step 1: Order the SPU:**

You have the flexibility to choose a preconfigured SPU based on the HP Vectra CS, ES, and ES/12 PC Model 21 and 22. The Model 21 and Model 22 includes 640 Kbyte RAM, a 20 Mbyte hard drive, a flexible drive, serial/parallel ports, a Multimode or EGA video card, the HP Terminal Program, and a keyboard.

The HP Vectra RS/16 and RS/20 PC can also be built up to an HP Vectra 3000 PC configuration.

**Step 2: Specify the Country Option:**

The country option consists of three letters which together specify the country and language. While the list is extensive, the more common options include:

<u>Opt.</u>	<u>Country</u>	<u>Language</u>
ABA	U.S.	English
ABB	Europe (HPSA)	English
ABD	Germany	German
ABE	Spain	Spanish
ABF	France	French
ABH	Netherlands	Dutch
ABK	Intercon	English
ABM	Latin-America	Spanish
ABN	Norway	Norwegian
ABP	Switzerland	German
ABQ	Switzerland	French
ABS	Sweden	Swedish
ABU	United Kingdom	English
ABV	Multiple countries	Arabic/English
ABW	Belgium	Flemish
ABX	Finland	Finnish
ABY	Denmark	Danish
ABZ	Italy	Italian

**Step 3: Order the display:**

If a Model 21 is being ordered, then order a Multimode display. If a Model 22 is being ordered, then order an EGA display.

**Step 4: Order the operating system:**

The operating system of the new Vectra PC family is MS-DOS 3.2.

---

**AdvanceLink  
is Optional**

Included with each system is the HP Terminal Program. This software is nearly identical to the terminal emulation portion of today's AdvanceLink product. Unlike AdvanceLink, however, the HP Terminal Program does not have file transfer capabilities or command macros. If these communication features are required, then AdvanceLink will need to be added to the order (HP 68333F).

**Examples**

The following are examples of what to order to obtain the new "Vectra 3000 PC" configurations (U.S. version):

	EGA, U.S. versions			Monochrome, U.S. versions		
HP Vectra CS PC	D1122A 35743A 45951B	#ABA	Model 22 EGA Display MS-DOS 3.2	D1121A 35731A 45951B	#ABA	Model 21 Multimode Display MS-DOS 3.2
HP Vectra ES PC	D1222A 35743A 45951B	#ABA	Model 22 EGA Display MS-DOS 3.2	D1221A 35731A 45951B	#ABA	Model 21 Multimode Display MS-DOS 3.2
HP Vectra ES/12 PC	D1322A 35743A 45951B	#ABA	Model 22 EGA Display MS-DOS 3.2	D1321A 35731A 45951B	#ABA	Model 21 Multimode Display MS-DOS 3.2

**To Order**

To order, contact your dealer or HP sales office.

The Hewlett-Packard Vectra RS/20 Personal Computers offer the highest performance possible in a personal computer today—using the 20 MHz Intel 80386 microprocessor and Hewlett-Packard designed and manufactured high performance disc drives. The Hewlett-Packard Vectra RS/16 computers provide the same 80386 functionality and expandability with somewhat lower performance. Utilizing the power of the 80386 microprocessor in a floor-mounted package, both HP Vectra RS/20 and RS/16 systems have the power, functionality and expandability to meet the needs of the most demanding personal computer applications.

All HP Vectra RS models will begin shipping during the first calendar quarter of 1988—making them among the first of the second generation of 80386 PCs to ship. This article provides an overview of these systems.

**Premium Performance—  
A Systems Approach**

The quality HP Vectra RS/20 system performance results from a careful system optimization of subsystems and components. The microprocessor speed, memory subsystem and mass storage subsystems are particularly important. The HP Vectra RS/16 offers a lower performance at a lower price.

The HP Vectra RS/20 and RS/16 systems have the most powerful microprocessor in the PC industry, the Intel 80386, operating at 20 MHz and 16 MHz speeds respectively. They also employ an advanced interleaved page mode memory architecture featuring extremely fast memory to permit zero wait state memory accesses. Up to 16 MBytes of 32-bit memory can be supported on the processor board.

The extensive mass storage offering features Hewlett-Packard designed and manufactured, 17 millisecond 103 MByte, 155 MByte and 310 MByte discs using ESDI interfaces, as well as an entry-level 28 millisecond 40 MByte ST-506 system. Two hard discs are supported internally, for a maximum of 620 MBytes. An intelligent disc controller features 1:1 interleave factor and a full track buffer to further improve the performance of the ESDI mass storage subsystems.

Floating point computational performance can be enhanced with math coprocessors: The HP Vectra RS systems are compatible with both the optional Intel 80387 numeric coprocessor and the more specialized Weitek 1167 floating point accelerator (available from third parties).

The HP Vectra RS systems also have large, 330W peak (200 watt continuous) power supplies, six half-height mass storage shelves, and expansion potential to accommodate eight industry-standard accessory cards.

---

**Industry Standards**

The Vectra RS systems are designed to operate with the thousands of applications and accessory cards currently compatible with the IBM PC/AT. The Vectra RS systems run these existing applications significantly faster than 80286-based systems. Of course, these Vectra RS systems will also run Microsoft's OS/2 when it becomes available, and future applications written for OS/2 will continue to benefit from the power of these systems.

The HP Vectra RS is also compatible with third-party operating systems such as XENIX/386 and LAN server software such as Novell NetWare and Ungermann-Bass Net/One. These systems are also designed to operate with 80386 control programs to permit multi-tasking of DOS 3.x applications, where x denotes part of the version number. The HP Vectra RS systems have the power to benefit users of today's applications and they have the architecture to extend this benefit with future operating systems.

---

**Solutions**

The HP Vectra RS/20 and RS/16 systems provide solutions to meet varied needs: from PC-CAD to sophisticated personal productivity to LAN servers.

With Windows/386, multiple MS-DOS™ applications can be run at the same time, each with up to 640 KBytes of memory. Multiple MS-DOS applications can be simultaneously run in foreground or background, or in exclusive mode for dedicated system use and better application performance. Each MS-DOS application can be run in a window, allowing concurrent viewing with other Windows and MS-DOS applications—

especially useful for monitoring the status of background applications. Windows/386 implements the Lotus-Intel-Microsoft Expanded Memory Specification (LIM EMS) to permit use of extended memory as expanded "Above Board" memory. Windows/386 also includes a disc cache utility that improves hard disc performance when used with Windows or DOS 3.x applications.

The HP Vectra RS systems are part of a complete collection of HP business solutions, which include the HP LaserJet Series II and HP LaserJet 2000, the HP 7550A plotter and HP ScanJet Scanner as well as many other diverse peripherals and personal productivity software. They are also part of a complete collection of HP technical solutions, which include the HP DraftMaster and DraftPro plotters, the HP Graphics Tablet and HP SketchPro tablet, the HP Mouse plus many other peripherals and networking products.

**HP Vectra RS/20 and RS/16 PC Configurations**

All HP Vectra RS/20 PCs use a 20 MHz 80386 microprocessor and come with a 1.2 MByte flexible disc drive, one serial port and one parallel port.

<b>Model</b>	<b>Hard Disc (MBytes)</b>	<b>Memory (MBytes)</b>	<b>Disc Interface</b>
Model 40 PC D1600A	40	1	ST-506
Model 100 PC D1602A	103	2	ESDI
Model 150 PC D1603A	155	2	ESDI
Model 300 PC D1604A	310	2	ESDI

**HP Vectra RS/16 PC Configuration**

The HP Vectra RS/16 PC uses a 16 MHz 80386 microprocessor and comes with a 1.2 MByte flexible disc drive, one serial port and one parallel port.

<b>Model</b>	<b>Hard Disc (MBytes)</b>	<b>Memory (MBytes)</b>	<b>Disc Interface</b>
Model 40 PC D1500A	40	1	ST-506

For more information contact your dealer or HP sales representative.

---

The hard discs in the Models 100, 150 and 300 Vectra RS/20 PCs are new mechanisms, designed and manufactured by HP.

These 5.25-inch Winchester drives feature 17 ms average seek time and come in 103, 155, and 310 megabyte sizes, making them the fastest large drives currently offered by any major PC vendor—including IBM and Compaq. They are teamed with an advanced ESDI interface giving the RS disc subsystems industry leading performance, which contributes greatly to the overall Vectra RS system performance.

Ruggedness and reliability of the disc mechanisms are also key benefits. Ruggedness is evident in its high tolerance to thermal variations and its ability to operate in the 0 to 50 degree C range, the widest operating temperature in the 5.25-inch class. The mechanism also boasts the highest reliability for a 5.25-inch mechanism with a rated 40,000 hour MTBF (Mean Time Between Failure) reliability specification.

For more details, contact your dealer or HP sales representative.

---

The new Vectra Disc Operating System, HP Vectra MS-DOS 3.2, revision B.01.02, U.S. English version (HP 45951B) is now available. The localized versions (HP 45951Bx, where x denotes localized versions) are also available in Europe and Latin America. The HP Vectra preassembled solutions (such as HP Vectra Publisher PC and HP Vectra ES/12 StarLAN PC) shipped on or after October 1 (October 19 for localized versions) include this new operating system. The HP Vectra MS-DOS 3.1 products (HP 45951Ax) will be discontinued on January 1, 1988.

Vectra MS-DOS 3.2 is a compatible superset of IBM PC-DOS 3.2. The product includes additional HP utilities to improve usability and functionality.

While IBM PC-DOS 3.2 will support IBM 720 Kbyte format, HP Vectra MS-DOS 3.2 will also support HP 710 Kbyte, double-sided format (used on the HP Touchscreen PCs) and the IBM 1.44 Mbyte format (used on the IBM PS/2 series). Note: The 1.44 Mbyte format is possible only with the new high density 3.5-inch flexible discs (identified by their black plastic shells).

Other HP pluses to the MS-DOS 3.2 product include the Personal Applications Manager, File Manager, Multi-Voluming Utility, and Multiple Character Set Utilities.

The Personal Applications Manager (PAM) and File Manager make computer use easier than using the "C>" MS-DOS prompt. The Multi-Voluming Utility allows use of hard discs larger than the 32 Mbyte limit imposed by MS-DOS. The Multiple Character Set Utilities allows translation of extended character sets (international, math, and line drawing characters) between the HP Vectra PCs (and IBM compatibles) and HP 3000s, HP Touchscreen PCs, and HP printers.

Other changes from MS-DOS 3.1 are the new FORMAT and SYS commands. The new FORMAT and SYS commands will no longer have the /P switch to transfer PAM onto work discs. Instead, the new PAMINSTL utility will install or remove PAM.

Programmers wanting detailed information about HP Vectra MS-DOS 3.2 may purchase the MS-DOS 3.2 Programmer's Reference (HP 5061-8971).

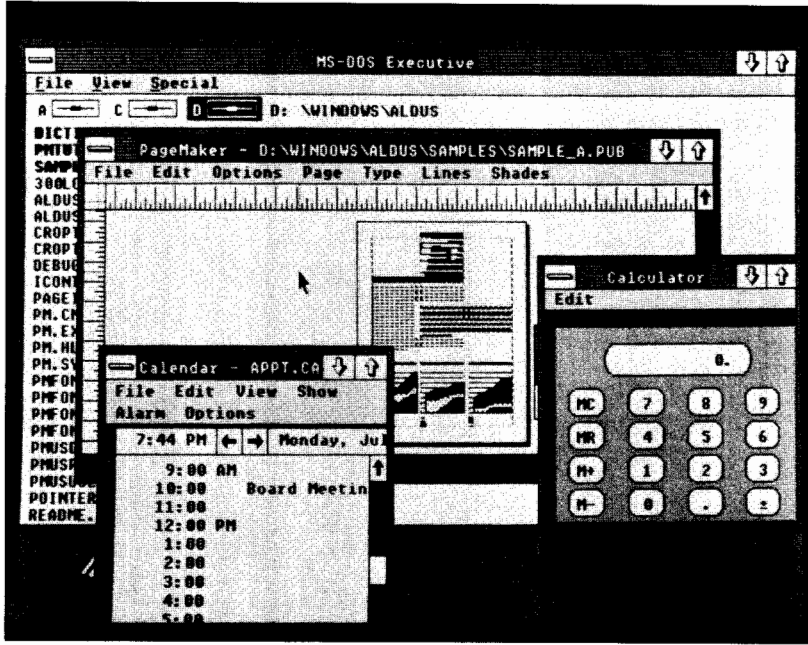

**Note for users with the U.S. version:** The U.S. version of HP Vectra MS-DOS 3.2, revision B.01.01, has been shipping since July 1. The new release, B.01.02, differs only in that it also supports the new 1.44 Mbyte format. Users who have B.01.01 and are purchasing the new HP 3.5-inch 1.44 Mbyte flexible disc drive (HP 45813A) may order the B.01.01 to B.01.02 upgrade (HP 45813A, option 001), which has a U.S. list price of \$25. The upgrade consists of the MS-DOS 3.2 and supplemental discs and change pages to the manuals. Users who do not need the 1.44 Mbyte format do not need the DOS upgrade.

---

HP has introduced a new Microsoft® Windows generation for the HP Vectra PC family. Now there are two versions, Windows 2.0 and Windows/386, that provide all the current advantages of Windows, plus build a foundation for the future. Both versions feature the new and advanced Windows interface that looks and works exactly like the one that will be in the future applications for the OS/2 operating system.

---

**Microsoft Windows 2.0** Microsoft Windows 2.0 is a more powerful version of the original Windows product. It is supported across the entire family of HP Vectra Personal Computers, including the new HP Vectra CS, ES, and RS PCs, as well as all original Vectra systems. (Windows 2.0 replaces the existing version of Microsoft Windows for the HP Vectra PC.)

A key addition to Windows 2.0 is the new Windows interface with overlapping Windows and enhanced keyboard and mouse capabilities. With Windows 2.0 you can also take full advantage of the Vectra expanded memory accessories. Use expanded memory to simultaneously run multiple Windows applications at their full performance, and to switch rapidly between MS™-DOS applications. Windows 2.0 also includes a disc cache program, that works with expanded (and extended) memory to reduce the number of times your system reads from the disc, improving your system performance.

Windows 2.0 is an excellent choice for Windows-based solutions, such as Desktop Publishing featuring PageMaker™ from Aldus, and as a general purpose MS-DOS application environment manager.

---

**Microsoft  
Windows/386**

Microsoft Windows/386 is an extended version of Windows that takes full advantage of 80386-based personal computers, like the new HP Vectra RS PCs.

With Windows/386, multiple MS-DOS applications can be run at the same time, each with up to 640 KBytes of memory. Multiple MS-DOS applications can be simultaneously run in foreground or background, or in exclusive mode for dedicated system use and better application performance. Each MS-DOS application can be run in a window, allowing concurrent viewing with other Windows and MS-DOS applications—especially useful for monitoring the status of background applications.

Windows/386 also includes a disc cache program and support for applications written to use the Lotus-Intel-Microsoft Expanded Memory Specification. The capabilities of the 80386 processor allow full implementation of the LIM EMS interface without the need for expanded memory hardware.

---

**Features  
Common  
to Both**

Both Windows 2.0 and Windows/386 offer the new Windows interface that is consistent with OS/2 Presentation Manager and provides full compatibility with earlier Windows application software. Disc caching to improve performance with both Windows and MS-DOS applications is also standard with both versions. And with Windows 2.0 and Windows/386 for the HP Vectra PC you can take advantage of complete Hewlett-Packard support.

---

**Ordering  
Information**

**Microsoft Windows 2.0  
Presentation Manager for the HP Vectra PC**

HP 45954B (5.25-inch discs)  
Available 4th Quarter 1987  
(For use with the HP Vectra CS, ES, or RS PC)

HP 45954C (3.5-inch discs)  
Available 1st Quarter 1988  
(For use with the HP Vectra Portable CS PC)

**Microsoft Windows/386  
Presentation Manager for the HP Vectra PC**

HP D1651A option ABA (5.25-inch discs)  
Available 1st Quarter 1988  
(For use with the HP Vectra RS PC)

Microsoft Windows for the HP Vectra PC  
(HP 45954A), Version 1.03, was discontinued  
November 1, 1987. A Microsoft Windows 2.0  
upgrade is available 4th Quarter 1987.

To order the upgrade (HP 45954-60001), follow  
the general instructions in the article "Software  
Exchange Kits" in the green pages of this issue.  
To purchase the product for the first time contact  
your dealer or sales representative.

---

Three new Vectra Publisher PC bundles for desktop publishing are available. These new models replace HP product numbers 72496A and 72497A, which are no longer available.

The new bundles offer a broader range of desktop publishing solutions, which include increased performance, greater storage capacity for "power" users, and competitive pricing.

The three new configurations are as follows:

■ **Vectra Publisher ES Model 21**

The 8 MHz monochrome Vectra Publisher includes a 1.2 MByte flexible disc drive, a 20 MByte internal hard disc, a Multimode Video Display Adapter and Monitor, and a "Personality Pack" containing MS-DOS 3.2, PC Kit, Keyboard, MS Windows for the Vectra PC, Aldus PageMaker software, HP Mouse and customized user documentation.

■ **Vectra Publisher ES/12 Model 22**

Same as the Vectra Publisher Model 21, except includes 12 MHz Vectra ES/12 Model 22 PC and EGA Video Adapter and monitor.

■ **Vectra Publisher ES/12 Model 42**

Same as the Vectra Publisher Model 22, except includes Vectra ES/12 Model 42 PC and 40 MByte internal hard disc.

---

**Ordering  
Information**

In addition to making it easier to configure and order, the Vectra Publisher bundles cost less than buying the components individually. To order a Vectra Publisher PC choose the HP product number D1200A and the "must order" options which complete the system:

**Vectra Publisher PC HP D1200A**

Vectra Publisher ES Model 21:

- Option 011 Vectra ES PC Model 21
- Option 051 Multimode Monitor
- Option ABA U.S. Personality Pack\*

Vectra Publisher PC ES/12 Model 22:

- Option 017 Vectra ES/12 PC Model 22
- Option 052 Enhanced Graphics Display
- Option ABA U.S. Personality Pack\*

Vectra Publisher PC ES/12 Model 42:

- Option 014 Vectra ES/12 PC Model 42
- Option 052 Enhanced Graphics Display
- Option ABA U.S. Personality Pack\*

\*International language versions available

For further information, contact your dealer or HP sales representative.

Bundled office solutions based on two new members of the HP Vectra family of PCs, the HP Vectra CS StarLAN PC and HP Vectra ES/12 StarLAN PC are available.

Both the Vectra CS and Vectra ES StarLAN PCs include:

- Preamsembled CPU with 640 KByte RAM, single floppy (360 KByte for Vectra CS and 1.2 MByte for Vectra ES/12) and 20 MByte hard disc drives, Serial/Parallel ports, HP StarLAN interface card and choice of EGA or Multimode Monochrome video adapter
- EGA or Multimode Monochrome monitor Vectra StarLAN
- Vectra StarLAN Personality Pack which contains the new Enhanced Vectra Keyboard, PC Kit with documentation and HP Terminal Program software, HP StarLAN user software, Vectra DOS 3.2 and the customized installation guide.

The HP Vectra PC bundled solutions are now ordered with one system product number and three product options which must be ordered to complete the system:

**HP Vectra StarLAN PC Bundles**

HP D1201A Vectra CS StarLAN PC-Monochrome:

Option 001  
Option 051  
Option ABA (U.S.)\*

HP D1201A Vectra CS StarLAN PC-EGA:

Option 002  
Option 052  
Option ABA (U.S.)\*

HP D1202A Vectra ES/12 StarLAN PC-Monochrome:

Option 015  
Option 051  
Option ABA (U.S.)\*

HP D1202A Vectra ES/12 StarLAN PC-EGA

Option 016  
Option 052  
Option ABA (U.S.)\*

\*International language versions available

These new bundles replace the current HP Vectra StarLAN PC Model 68 (HP 45968A) and Model 69 (HP 45969A).

HP Vectra CS StarLAN PC and Vectra ES/12 StarLAN PC will be available worldwide.

For further information contact your dealer or HP sales representative.

---

---

The HP Terminal Program is a terminal emulation software package which will be shipped standard with all HP Vectra Family PCs shipped after October 1.

The program enables HP Vectra Family PCs to access alphanumeric and graphics applications on the HP 1000, HP 3000, and HP 9000, including such programs as VPLUS/3000, HPDeskManager, Query/3000, DSG/3000, HPDraw and Graphics/1000-II. In addition, the HP Terminal Program features DEC VT100 terminal emulation allowing users to access applications written for DEC VT52 and VT100 terminals.

The HP Terminal Program provides all of the features normally found on HP block mode and color graphics terminals, plus PC-specific features like write to disc and read from disc.

The HP Terminal Program is also compatible with existing Vectra PCs and IBM PC/XT/ATs. So if you need it as an independent accessory, just order the HP 24597A HP Terminal Program.

To order, contact your dealer or HP sales representative.

Hewlett-Packard introduced the HP RuggedWriter 480 printer on October 1, 1987. The new printer is a high-performance, wide-carriage, 24-wire serial impact dot matrix printer that prints 480 characters per second (cps) draft quality and 240 cps letter quality.

Software support and compatibility are facilitated through the implementation of two built-in control modes, PCL III and Epson LQ 1000. Users with third-party or PC-based applications software will find compatibility through use of the switch-selectable Epson LQ-1000 emulation. For software applications with built-in PCL III drivers select PCL mode and chose the RuggedWriter 480 driver in the application. You can use this new printer with most software applications on the market using the two built-in drivers.

The following list is a sampling of software applications that have been tested and were found to have excellent results, using the Epson LQ-1000 driver or using their built-in PCL III driver:

Lotus 1-2-3  
Lotus Symphony  
Microsoft Word  
Framework II  
Multimate and Multimate Advantage  
Wordstar 2000  
WordPerfect  
AdvanceWrite Plus  
The Gallery Collection (Executive MemoMaker,  
Drawing Gallery, Charting Gallery)  
VolksWriter

The RuggedWriter 480 owner's manual contains additional information on software support in the application notes section.

To order contact your dealer or HP sales representative.

---

A wide array of new LaserJet font offerings and utilities are now available. This article highlights an enhanced cartridge font, two new cartridge fonts, one soft font that adds new font capabilities to LaserJet printers, and new font utilities.

---

**New 48-Point  
Soft Fonts for  
LaserJet Series II  
and LaserJet 2000**

The Helv Headlines soft font, HP 33412AG, offers four new faces that are useful in many desktop publishing applications: Serifa,<sup>™</sup> Helv Condensed Black, Helv Condensed Black Italic and Helv Outline. This is HP's first set of "hand-crafted" 36 and 48 point Bitmap fonts exclusively for the LaserJet Series II and LaserJet 2000 printers. All LaserJet family printers (LaserJet PLUS, LaserJet 500 PLUS, LaserJet Series II and LaserJet 2000) can use the additional fonts in the following point sizes: 14, 18, 24 and 30 points.

Two utilities are included with the HP 33412AG product: MakeFont and FontLoad. MakeFont installs any selected typeface of the Helv Headline product onto a PC in the desired orientation, point size and symbol set. Roman-8, ECMA-94 Latin 1, PC-8, PC-8 D/N, Code Page 850, Legal, and several ISO symbol sets are supported. Note: Symbol set limitations exist for the LaserJet PLUS and LaserJet 500 PLUS.

FontLoad, a user-friendly font utility, makes it easy to download any installed soft font. Mouse control, soft keys and help menus make this program a snap to use.

FontLoad is also available as a separate product. The Helv Headlines soft font is available too and includes both utilities (PCLPak is not included).

---

**New LaserJet Series II  
and LaserJet 2000  
Font Family**

Two new font cartridges, the HP 92290S1 and 92290S2, were developed for use exclusively with the LaserJet II and LaserJet 2000 printers.

The HP 92290S1, introduced earlier this year, completes the internal family of LaserJet fonts with a Courier Italic 12-point, 10-pitch font. A full family of 10-point, 12-pitch Courier (Roman, bold, and italic) offers European users an added bonus: 80 columns of information on A4 paper.

The HP 92290S2 offers the TmsRmn and Helv fonts in a LaserJet Series II and LaserJet 2000 printer format. It also includes fonts in 8, 12 and 14 point sizes.

PC-8 (also referred to as IBM-US) and PC-8 D/N character sets map the characters found on existing IBM and compatible PCs directly to the HP 92290S1 and 92290S2 cartridges. Because the original LaserJet and LaserJet PLUS printers do not understand PC-8 symbol mapping, the 92290S1 and 92290S2 cartridges are only compatible with the LaserJet Series II and LaserJet 2000 printers.

**Improved Microsoft Cartridge**

The popular HP 92286Z Microsoft® 1 cartridge has been expanded. European users now have access to the most versatile selection of TmsRmn and Helv fonts available on a LaserJet cartridge. Based on HP's TmsRmn and Helv soft fonts, this cartridge continues to offer kerning for all LaserJet printers. Roman, bold and italic styles are available from 8-point Roman to 14-point bold. The international characters are found in the Roman-8 and 8 bit ECMA-94 Latin 1 symbol sets. The name has been slightly modified to "HP 92286Z Microsoft 1A." This cartridge is immediately available and supersedes the Microsoft 1 font cartridge. Because existing applications remain unchanged, there will not be a trade-in program.

**Product Information**

<b>HP Product</b>	<b>Description</b>
92290S1	Courier Document 1
92290S2	TmsRmn/Helv Report
33412AG	Helv Headlines
92286Z	Microsoft 1A
33407B	FontLoad

If you need more information about these products, contact your dealer or HP sales office.

Serifa is a trademark of Fundicion Tipographica Neufvilla, Sa.

AdvanceWrite Plus—the natural successor to AdvanceWrite I, II and III as Hewlett-Packard’s comprehensive, full-featured word processing package, is now available.

With over 50 new features, including integrated text, graphics, and scanned images, AdvanceWrite Plus ranks among the top word processing packages like WordPerfect, MSWord and MultiMate Advantage. AdvanceWrite Plus has extra advantages such as a truly integrated spreadsheet and the ability to merge text with graphics and images without an expensive bridging program.

We have completely rewritten the user documentation with information and suggestions you have given to us. The user training has been revamped as well, taking into consideration the comments made by the thousands of AdvanceWrite I, II and III users already trained.

**Image Integration**

Imagine including pictures of the staff on your organization charts or having a map of the building site in the middle of your letter. It’s easy to do: Simply create a .tif file using Scanning Gallery and the HP ScanJet (HP 9190A), then merge the file into an AdvanceWrite Plus document and print.

**Graphics Integration**

Use AdvanceWrite Plus with Graphics Gallery (HP 68352F) for very professional results. Any graphics file in .tif format may be merged with AdvanceWrite Plus text.

**IBM PC/XT/AT and PS/2**

We know that you may have other hardware in your workgroup environment so we have made sure that AdvanceWrite Plus will work on the IBM PC/XT/AT and the new PS/2, models 30, 50, 60 (3½ inch media).

<b>New HP Vectra PCs</b>	<p>AdvanceWrite Plus is also supported on the newest members of the family of HP Vectra PCs: the ES, RS and CS, as well as the HP Vectra Portable CS and HP Vectra Portable CS model 20.</p> <p>AdvanceWrite Plus has two keyboard layouts—one for the original HP Vectra PC keyboard you are used to using with AdvanceWrite I, II and III and one which has been designed for IBM or HP's IBM-compatible keyboards. The original layout is known as the standard layout and the new one is known as the DOS-compatible layout. A real benefit to the new layout is that it allows you to use memory resident third party software like Turbo Lightning, SideKick and Inset to name a few you have asked about.</p>
<b>What else is new?</b>	<p><b>Equations processing feature:</b> Now you can enter and edit multi-level chemical, mathematical and scientific equations on the screen. Greek/Math characters are seen as they will print.</p> <p><b>On-screen columns:</b> You can have up to 10 columns on the screen in newspaper style or side by side. It's a better implementation of the original feature—much easier to set up and you see the columns on the screen while you type. It provides much greater flexibility for producing tables and columnar documents.</p> <p><b>Editable macros:</b> User defined function keys enable you to store up to 1,000 keystrokes, saving time and effort. For example you can set up a memo and have the system pause when you need to type variable information, all with the press of two keys.</p> <p>Other features include table of contents and index generation, the document search facility (Wordbase Manager), zoom, glossary and section outline numbering.</p>

---

**AdvanceWrite Plus and HP Printers** Our most popular office printers are supported by AdvanceWrite Plus:

- HP 2225C ThinkJet—centronics interface, Epson or HP Mode
- HP 2225D ThinkJet—serial interface, Epson or HP Mode
- HP 2228A QuietJet
- HP 2227A QuietJet Plus
- HP 3603A PaintJet—letter quality text and color graphics inkjet printer
- HP 2235A RuggedWriter 480—dot-matrix draft/letter quality printer
- HP 2601A Letter quality daisywheel printer
- HP 2603A Low-cost, letter quality, daisywheel printer
- HP 2684A LaserJet 2000
- HP 2686A LaserJet
- HP 2686A LaserJet + option 200 or 210
- HP 2686D LaserJet 500 PLUS
- HP 33440A LaserJet Series II
- HP 2932A General purpose dot matrix printer
- HP 2934A Letter quality dot matrix office printer

---

**HP LaserJet Family Font Support** The following HP LaserJet printer font cartridges and soft fonts are supported by AdvanceWrite Plus:

Cartridges: A B C D E F G H I J K L M N  
P Q R S T U V Y

Soft fonts: AA AB AC AD AE AF DA EA RA  
SA TA UA

---

**Ordering Information**

To order AdvanceWrite Plus, contact your local dealer or HP sales representative and request HP 27546F.

If you have AdvanceWrite I, II or III you can upgrade to AdvanceWrite Plus by purchasing one of the following kits:

27546-60001 AdvanceWrite I to AdvanceWrite Plus

27546-60002 AdvanceWrite II to AdvanceWrite Plus

27546-60003 AdvanceWrite III to AdvanceWrite Plus

To order these kits, follow the general ordering instructions in the "Software Exchange Kits" article in the green pages of this issue.

Site license upgrades are also available. Please contact your HP sales representative or dealer for more information.

AdvanceWrite Plus is jointly developed with Samna Corporation  
Multimate® is a U.S. trademark of Multimate International Corp.  
Turbo Lightning, SideKick and Inset are trademarks of Borland International.

## Welcome to the Encyclopedia

---

Welcome to the "Encyclopedia" section of the *HP PC Communicator*—bringing together all the news you need on each of the software packages and systems that you use.

Coupled with the manuals, your *HP PC Communicator* back issues and subscription provide everything you need to make the best use of your personal computer.

---

### What's in the Encyclopedia?

- The HP PC Bugline—the information about HP PC questions, problems, and solutions too late to classify.
- The Encyclopedia Index—an index of Encyclopedia articles for all issues, listed by system.

Encyclopedia articles containing:

- Product Description—a one- or two-sentence explanation of what the product does.
- Encyclopedia Articles—a reference to any other Encyclopedia articles in previous *HP PC Communicator* issues covering this product.
- Most Frequent Questions—with answers, based on the experience of HP's Response Centers around the world.
- Software Problem Reports—a list of the major problems which have been reported.
- Manual Corrections or Updates—a list of corrections to the manuals for the product.
- Data Files—a description of the files used by the product, to aid in data transfer.
- Integration Features—a summary of any features built into the product to facilitate data transfer to other products.
- Data Transfer Procedures—specific techniques which have been discovered for data transfer to specific products.

The Encyclopedia entries are arranged so that you can remove them for insertion in your manuals or a separate binder.

---

### Which Products are Covered?

The Encyclopedia Table of Contents, given at the front of the section, is updated in every *HP PC Communicator*... directing you to the issues containing the latest articles for each product.

---

**\*In This Issue**

---

Running AdvanceMail through a modem is really fairly simple. It's just that there are more steps than in a direct connection setup. When you are using a direct connection, all of the work of establishing the connection for unattended transfer of mail can be done within AdvanceMail itself. When you use a modem, a dataswitch, X.25 connection or some other means that is not direct, you cannot use AdvanceMail alone to establish the connection. This is because AdvanceMail expects to be directly connected to a 3000, and looks for DC1 characters before going on to the next task.

However, you can get around this problem by using AdvanceLink or some other program to set up your connection first, and then run AdvanceMail. Chapter 13 of the *Getting Started with AdvanceMail* manual explains that you must alter several supplied files in order to use AdvanceLink or Reflection to establish the connection. However, it is a bit short on details. Be sure to read that section of the manual before going on here.

---

**The Basic Steps**

The steps that you need to take are as follows:

1. Run AdvanceLink to send the necessary commands to the modem to connect to the 3000. Let this program do all the connection work! Don't quit until you have the colon prompt (:).
2. Now run AdvanceMail and transfer any mail. When done, leave the program. Keep in mind that your connection is still established.
3. Run AdvanceMail again to log off, and to break the connection. This is very important where a modem is concerned, as not all host systems break the connection when you log off the system. You could find yourself with big phone bills otherwise!

---

It sounds like we no longer have an unattended situation, as three different programs need to be run. However, this problem can be overcome by placing the programs you need to run in a batch file, and running that instead. You will then see a sequence that looks something like this:

1. Choose batch file from the PAM screen.
2. Batch file runs AdvanceLink with an **&CHAIN** command in the INFO = string. AdvanceLink starts, immediately executes the command file listed in the INFO = string, and logs on to the HP 3000 by sending the appropriate commands to the modem. When the colon prompt (:) appears, the command file ends with an **&EXIT** command, but does not hang up the modem.
3. The Batch file takes back over, and runs AdvanceMail with -U -P and -B options in the command line. This will start AdvanceMail and begin mail transfer. If HPDESK is unavailable for some reason, it will enter that information in its log file, and quit. Otherwise it will transfer mail and then quit.
4. The Batch file gets control back, and executes AdvanceLink once again, with a different **&CHAIN** command in the INFO = string. AdvanceLink starts back up, and this time logs off, and hangs up the modem.
5. The Batch file gets control again, places a completion message on the screen, and quits.

---

#### **A Potential Problem**

While this is not very likely to happen, the only real problem that might occur with this sequence is if the process ties itself up between establishing the connection and hanging up the modem. If anything occurs to stop execution, the modem would be left connected to the host, and long distance charges would mount up. As there is no way to detect this, there is no real way to protect against this from the PC side. If the host side has a "bouncer" program that hangs up after so many minutes of activity, that should solve the problem.

## The Files

The following files contain the sequence that I use to log on to a local HP 3000. Note that these are not the same as the files in the AdvanceMail product. These are meant as examples, and you will need to modify them to fit your system. I am using AdvanceLink version B.00.01, and AdvanceMail version A.01.02, running on a Vectra PC. This is a delayed execution sequence that is started when I leave for the day, and does not actually dial up until 6:00 a.m. the next morning.

&EXIT
```

---

**What if you don't have AdvanceLink?**

It should be noted that there are other products out there that will get a modem to dial up, and you could use those to get connected to your HP 3000. You could also write your own programs to do the necessary connection work. However, none of these approaches would be supported by Hewlett-Packard. For this reason, you should give strong consideration to using AdvanceLink.

Mail Order Form	
Change-of-Address Form	

The level of capability provided by advanced personal computer software—together with the rapid evolution of this field—means that you may sometimes have questions that are not answered in the product manuals. Depending on where you purchased the specific software or hardware product, the best source of assistance for that product may be your own organization, your dealer or value-added reseller, an independent vendor, or Hewlett-Packard.

This section is designed to guide you through the process of obtaining the most rapid resolution of any question that you have. It is organized in a series of steps:

- Step 1: Is the answer in the *HP PC Communicator*?
- Step 2: Is the answer available through CompuServe?
- Step 3: Is support provided from within your own organization?
- Step 4: Was this product purchased from a dealer or value-added reseller?
- Step 5: Was this product provided by an independent vendor?
- Step 6: Telephone assistance from Hewlett-Packard
- Step 7: Training or consulting

By following these steps, you can rapidly and inexpensively get the answer you need.

---

**Step 1: Is the answer in the *HP PC Communicator*?**

The *HP PC Communicator* is the heart of our support program. This magazine brings you applications information, operational tips, programming techniques, information on software updates, manual corrections, and data on known software problems and their solutions.

The Encyclopedia section provides detailed, easily-accessed information on each major hardware and software product. Many of these sections are written by people from our HP HelpLine Response Centers, reflecting the most common questions and problems.

Refer to the article "Ordering *HP PC Communicator* Subscriptions" in the Current Information section of this issue for ordering details.

---

**Step 2: Is the answer available through CompuServe?**

HP maintains a database on the CompuServe™ on-line information service called HP OnLine—it contains product news, answers to frequently-asked questions, and other information. HP also facilitates user interaction by hosting an open forum where users may post messages for general user response. Periodically, HP may respond to selected user questions.

To gain access to HP OnLine, you must have an account with CompuServe (you are billed for CompuServe connect time and network services) and you must have a 300- or 1200-baud modem.

---

**Step 3: Is support provided from within your own organization?**

If you work in an organization which has several HP personal computers, there is often one person who coordinates the purchase, set-up, and training for your company or institution. In a large organization, this function is often provided by the central MIS, office-automation, or data-processing department. (For example, each Hewlett-Packard division or office has an Office Automation Coordinator, usually part of the information systems department, who provides personal computer training and assistance.)

Your internal support personnel have full knowledge of your organization's overall system: your internally developed programs, your particular operating and networking procedures ... and your specific hardware and software configuration. Your experts, in turn, have access to special resources within Hewlett-Packard. HP support services, such as training courses, are purchased to supplement your internal capabilities.

With centralized support within your organization, your support is localized and customized to your particular needs.

If you do not have an internal support capability, support for a product generally comes from the organization that sold you the product—the dealer, value-added reseller, or Hewlett-Packard.

---

**Step 4: Was this product purchased from a dealer or Value-Added Reseller?**

If this product was purchased from a dealer or Value-Added Reseller (VAR), they have worked with you to define your application and configure your system—perhaps selecting software or hardware not supplied or supported by Hewlett-Packard. Here, your dealer or VAR is the best source of assistance—knowing you, your needs, and your configuration well.

Authorized dealers and VARs are backed up by special support resources within HP . . . and, of course, the full range of Hewlett-Packard software and hardware support services may be purchased as a supplement to those provided by your dealer or VAR.

By buying your hardware, software, accessories, and supplies from an Authorized Hewlett-Packard Dealer or VAR who provides full support, you build up a continuing relationship—providing a local, personal, and uniquely-responsive support program customized for your business.

---

**Step 5: Was this product provided by an independent vendor?**

Many products which run on HP personal computers are developed and marketed by independent organizations—referred to in the personal computer industry as “Independent Software Vendors” (ISVs) or “Independent Hardware Vendors” (IHVs).

Hewlett-Packard publishes catalogs and directories listing certain classes of software and hardware products that ISVs and IHVs have tested for operation on our systems. We refer to these as “verified” or “listed” products. Because of the specialized knowledge required, your support for one of these products comes either directly from the original developer or through the dealer or value-added reseller from whom you purchased it.

---

**Step 6: Telephone assistance from Hewlett-Packard**

Telephone assistance is available from the worldwide network of Hewlett-Packard Response Centers for most products distributed by HP. (For certain specialized non-HP-developed products which are distributed by HP under our product number, we have made arrangements for support to come directly from the original developer. This is indicated in the product data sheet and the documentation supplied with the product.)

For telephone assistance outside the U.S. and Canada, call your HP Sales and Service Office and ask for the Personal Computer Response Center. In the U.S. and Canada, the telephone assistance program is called HP HelpLine.

Here is how the U.S./Canada HP HelpLine program works:

- The toll-free HP HelpLine number is:  
1-800/858-8867  
HP HelpLine is open Monday through Friday from 7 A.M. to 9 P.M. Eastern Standard Time (to 6 P.M. Pacific Standard Time).
- Calls to the HP HelpLine are paid for by one of three means:
  - By quoting a unique "certificate number" from a Call Certificate. Certificate packs are ordered by mail or telephone from HP's Direct Marketing Division.
  - By providing a VISA, MasterCard, or American Express charge authorization.
  - By identifying yourself as the Authorized Caller under a specific annual Software Support Agreement.
- When you call, a coordinator arranges for the appropriate HP support representative to return your initial call within two hours. Using a full set of software and documentation— together with computer knowledge, problem-solving skills, and access to further assistance via HP's worldwide telecommunications network—the support representative works with you to answer your question.
- HelpLine support does not extend to program development, program coding, isolation of coding errors, and implementation assistance. These areas are most economically resolved through on-site consulting and training, as described in Step 7, below.

- A call-incident is defined as a discussion of moderate duration focusing on one specific topic to resolve an inquiry or problem. A call-incident includes the time on the telephone discussing the question, time to research the solution, plus any additional call-backs required to clarify the question.
- The actual charge for a call-incident is not initiated until the call is closed. There is no charge if the call is the result of a specific documentation defect or software design problem . . . or if an answer cannot be found.

[Of course, this is only a summary of the new Personal Computer Assistance program. For details, please call the National Response Center at (800) 858-8867.]

---

**Step 7: Training or consulting**

Perhaps your need for support is most efficiently and economically met by training or consulting:

- Classroom training is available to supplement the documentation that accompanies your product. Courses can help first-time computer users rapidly build confidence and gain new skills away from the distractions of the day-to-day job. As HP training courses are developed, they are listed in the *HP PC Communicator*.

These courses can be taught at your facility using your own systems. Also, training to suit your specific needs can be designed and given through HP's computer consulting service.

Many dealers and value-added resellers teach similar courses or can arrange for Hewlett-Packard to teach a course in your area. To discuss training, call your local dealer, VAR, or HP office.

- Consulting service, available from Hewlett-Packard by the hour or by the day, provides personalized assistance in system operation, recommendations for improved performance, or suggestions on application design. Your dealer or value-added reseller may also have consulting services available. To discuss consulting, call your dealer or HP office.

---

**Get in Touch**

To get in touch with Vectra PC, Touchscreen/150, HP 12x, and Portable owners in your area—and worldwide—join Interex, the International Association of Hewlett-Packard Computer Users. Interex is an independent group of HP computer users, with chapters and regional groups in 40 countries. If you join Interex, you will receive, at no cost, an assortment of *HP PC Communicator* back issues which pertain to your computer model. (There is a limited supply for some computer models.)

---

**Start a Local Chapter**

Local Interex Personal Computer chapters are now forming. For details on joining or starting a group in your area, contact Interex headquarters and ask for the pamphlet "Starting a Regional User Group."

---

**Member Services**

**Standard Users Support Service** includes a subscription to INTERACT Magazine, a subscription to the *Interrupt* newsletter, and an annual diskette from the Interex Contributed Software Library.

**Standard Users Support Service:**

North America . . . . . \$70  
Outside North America . . . . . \$95

---

**How to Join**

To join, fill out the form on the next page.

For more information, contact:

Interex Member Services Department  
680 Almanor Ave.  
Sunnyvale, CA 94086  
U.S.A.  
Telephone 408/738-4848  
Telex #4971527

The HP Vectra Personal Computers are a family of high-performance PCs designed to provide hardware and software compatibility with industry standards. Members of the Vectra PC family include:

**The Vectra CS PC:** a 7.16 MHz 8086-compatible, is the entry-level member of the Vectra PC family that delivers exceptional value for basic office computing needs.

**The Vectra ES PC:** an 8 MHz Intel 80286 IBM PC/AT compatible that offers mainstream business users growth to the next generation operating systems (OS/2) at an economical price.

**The Vectra ES/12 PC:** based on the 12 MHz Intel 80286 processor, this system provides superior performance and IBM PC/AT compatibility for the demanding business user.

HP's Vectra PCs can also be purchased as a complete system in two popular configurations: the HP Vectra Publisher PCs for desktop-publishing applications and the HP StarLAN PCs which provide all the elements needed to link to a StarLAN network as a workstation or a server. Both preassembled systems offer ordering and assembly ease.

---

**The HP Vectra  
Publisher PC**

Three configurations of the Vectra Publisher are available. Order the product number D1200A and three "Must Order" options to select a complete Vectra Publisher workstation based on either the Vectra ES PC or the Vectra ES/12.

**Vectra Publisher PC Product Number D1200A**

**Option 011: Vectra Publisher ES Model 21**

Includes 8 MHz 80286 processor, 640KB RAM, 1.2 Mbyte flexible disc drive, a 20 Mbyte internal hard disc, and a Multimode Video Adapter.

**Option 051: 12-inch Monochrome Monitor**

**Option ABA:** U.S. personality pack includes HP Vectra DOS 3.2, PC Kit with terminal emulation software, Enhanced Vectra PC Keyboard, MS Windows for the Vectra PC, Aldus PageMaker software, HP Mouse and customized user documentation.\*

**Option 017: Vectra Publisher ES/12 Model 22**  
Includes 12 MHz 80286 processor, 640KB Ram, 1.2 Mbyte flexible disc drive, a 20 Mbyte internal hard disc and an Enhanced Graphics Video Adapter.

**Option 052:** 13-inch EGA Video Display

**Option ABA:** U.S. Vectra Publisher PC Personality Pack

**Option 014: Vectra Publisher ES/12 Model 42**  
Includes 12 MHz 80286 processor, 640KB Ram, 1.2 Mbyte flexible disc drive, a 40 Mbyte internal hard disc and an Enhanced Graphics Video Adapter.

**Option 052:** 13-inch EGA Video Display

**Option ABA:** U.S. Vectra Publisher PC Personality Pack

\*International language versions are available. See your dealer or HP sales representative for more information.

---

**The HP Vectra  
StarLAN PC**

There are four HP Vectra StarLAN PC configurations available depending upon your system price/performance and video requirements. Order the product number D120XA and three "Must Order" options to select a complete Vectra StarLAN PC solution based on either the Vectra ES PC or the Vectra ES/12 PC.

**Vectra CS StarLAN PC Product Number D1201A**

**Option 001: Vectra CS StarLAN PC—  
Monochrome**

Includes the Vectra CS SPU with 640KB RAM, 360 Kbyte flexible disc drive, a 20 Mbyte internal hard disc, HP StarLAN Interface and a Multimode Video Adapter.

**Option 051:** 12-inch Multimode Monitor

**Option ABA:** U.S. personality pack includes HP Vectra DOS 3.2, PC Kit with Terminal Emulation Program, Enhanced Vectra PC Keyboard, HP StarLAN user software and customized user documentation.

**Option 002: Vectra CS StarLAN PC—EGA**

Includes the Vectra CS SPU with 640KB RAM, 360 Kbyte flexible disc drive, a 20 Mbyte internal hard disc, HP StarLAN Interface, an Enhanced Graphics Video Adapter.

**Option 052:** 13-inch EGA Video Display

**Option ABA:** U.S. Vectra StarLAN PC Personality Pack

**Vectra ES/12 StarLAN PC Product Number  
D1202A**

**Option 015: Vectra ES/12 StarLAN PC—  
Monochrome**

Includes the Vectra ES/12 SPU with 12 MHz 80286 processor, 640KB Ram, 1.2 Mbyte flexible disc drive, a 20 Mbyte internal hard disc, HP StarLAN Interface and a Multimode Video Adapter.

**Option 051:** 12-inch Multimode Monitor

**Option ABA:** U.S. Vectra StarLAN PC Personality Pack

**Option 016: Vectra ES/12 StarLAN PC—EGA**

Includes the Vectra ES/12 SPU with 12 MHz 80286 processor, 640KB Ram, 1.2 Mbyte flexible disc drive, a 20 Mbyte internal hard disc, HP StarLAN Interface and an Enhanced Graphics Video Adapter.

**Option 052:** 13-inch EGA Video Display

**Option ABA:** U.S. Vectra StarLAN PC Personality Pack

---

### **The Vectra CS PC**

The Vectra CS may be purchased in a variety of configurations for flexibility in assembling specific systems.

Each of the following models includes a 7.16 MHz processor, compatible with the Intel 8086, 640 Kbytes RAM, both a serial and parallel I/O interface, the HP Terminal Program, HP Vectra Disc Cache Program, the Enhanced Vectra PC keyboard, user documentation, and video adapter cards and disc storage as indicated.

**D1110A Vectra CS Model 10\***

Includes one 5.25-inch 360 Kbyte flexible disc drive.

**D1111A Vectra CS Model 11\***

Includes two 5.25-inch 360 Kbyte flexible disc drive and Multimode Video Adapter (monochrome).

**D1112A Vectra CS Model 12\***

Includes two 5.25-inch 360 Kbyte flexible disc drive and Enhanced Graphics Video Adapter (color).

**D1120A Vectra CS Model 20\***

Includes one 5.25-inch 360 Kbyte flexible disc drive and a 20 Mbyte hard disc.

**D1121A Vectra CS Model 21\***

Includes one 5.25-inch 360 Kbyte flexible disc drive, a 20 Mbyte hard disc and Multimode Video Adapter.

**D1122A Vectra CS Model 22\***

Includes one 5.25-inch 360 Kbyte flexible disc drive, a 20 Mbyte hard disc and Enhanced Graphics Video Adapter.

\*Must Order Language Option. Option ABA is U.S. English. International language versions are available. See your dealer or HP sales representative for more information.

---

**The Vectra ES PC**

The Vectra ES may be purchased in a variety of configurations for flexibility in assembling specific systems.

Each of the following models includes an 8 MHz Intel 80286 processor, 640 Kbytes RAM, a flexible and hard disc controller, both a serial and parallel I/O interface, an HP-HIL port, the HP Terminal Program, HP Vectra Disc Cache Program, the Enhanced Vectra PC keyboard, user documentation, and video adapter cards and disc storage as indicated.

**D1210A Vectra ES Model 10\***

Includes one 5.25-inch 1.2 Mbyte flexible disc drive.

**D1220A Vectra ES Model 20\***

Includes one 5.25-inch 360 Kbyte flexible disc drive and a 20 Mbyte hard disc.

**D1221A Vectra ES Model 21\***

Includes one 5.25-inch 360 Kbyte flexible disc drive, a 20 Mbyte hard disc and Multimode Video Adapter.

**D1222A Vectra ES Model 22\***

Includes one 5.25-inch 360 Kbyte flexible disc drive, a 20 Mbyte hard disc and Enhanced Graphics Video Adapter.

\*Must Order Language Option. Option ABA is U.S. English. International language versions are available. See your dealer or HP sales representative for more information.

---

**The Vectra ES/12 PC**

The Vectra ES/12 may be purchased in a variety of configurations for flexibility in assembling specific systems.

Each of the following models includes a 12 MHz Intel 80286 processor, 640 Kbytes RAM, a flexible and hard disc controller, both a serial and parallel I/O interface, an HP-HIL port, the HP Terminal Program, HP Vectra Disc Cache Program, the Enhanced Vectra PC keyboard, user documentation, and video adapter cards and disc storage as indicated.

**D1310A Vectra ES/12 Model 10\***

Includes one 5.25-inch 1.2 Mbyte flexible disc drive.

**D1320A Vectra ES/12 Model 20\***

Includes one 5.25-inch 360 Kbyte flexible disc drive and a 20 Mbyte hard disc.

**D1321A Vectra ES/12 Model 21\***

Includes one 5.25-inch 360 Kbyte flexible disc drive, a 20 Mbyte hard disc and Multimode Video Adapter.

**D1322A Vectra ES/12 Model 22\***

Includes one 5.25-inch 360 Kbyte flexible disc drive, a 20 Mbyte hard disc and Enhanced Graphics Video Adapter.

**D1340A Vectra ES/12 Model 40\***

Includes one 5.25-inch 360 Kbyte flexible disc drive and a 40 Mbyte hard disc.

**D1341A Vectra ES/12 Model 41\***

Includes one 5.25-inch 360 Kbyte flexible disc drive, a 40 Mbyte hard disc and Multimode Video Adapter.

**D1342A Vectra ES/12 Model 42\***

Includes one 5.25-inch 360 Kbyte flexible disc drive, a 40 Mbyte hard disc and Enhanced Graphics Video Adapter.

\*Must Order Language Option. Option ABA is U.S. English. International language versions are available. See your dealer or HP sales representative for more information.

## Discontinued Software

Marilyn Ruel, Jane Blando

### Replacement Media for Discontinued Software

We are committed to sustain support for Hewlett-Packard products well after technology advances and market demand cause us to discontinue offering a product for sale.

It is HP corporate policy to ensure availability of parts and full support services for your computer for five years beyond discontinuance. Specifically, this means:

- Replacement Media Exchange Kits available for five years from date of last HP shipment for each product in the table below.  
See the Software Exchange Kits article in this issue for information on the Kits.
- Availability of telephone assistance through Hewlett-Packard Help Line Response Centers.
- Continuing coverage in this magazine—the *HP PC Communicator*.

### For Computers

#### ■ The Portable

13269K	Vinyl replacement case
13269U	Carrying case—Leather
13269V	System carrying case
13269W	Attaché case
13269Z	Leather briefcase
82167A	HP-IL cable (0.5 meters)
82167B	HP-IL cable (1.0 meter)
92221M	RS232C modem cable (1.5 meters)
92221P	RS232C printer cable (1.5 meters)
92224F	RS232C gender converter (female)
92224M	RS232C gender converter (male)

#### ■ HP 120 Personal Computer

13242H	RS-232C cable (use 13242-60011 for replacement)
13269P	Carrying case (for HP 120 with short keyboard plus 9121 disc drive; or HP 120 with extended keyboard)
92171C	Keyboard drawer park
92171J	Keyboard park—large
92171T	System turntable
92240A	Display tilt unit
92240B	Display swivel unit
92250D	Dust cover
92220R	Right-angle HP-IB cable (0.3 meters long)
92251P	“Stacked” dust cover (for computer and disk drive)

#### ■ HP 125 Personal Computer

92160A	Thermal paper, blue print (box of 24 rolls)
92160B	Thermal paper, black print (box of 24 rolls)
92171C	Keyboard drawer park
92171T	System turntable
92207A	Anti-glare filter
92250B	Dust cover

#### ■ HP 150 Touchscreen Personal Computer

13242H	RS-232C cable (use 13242-60011 for replacement)
13269BB	Carrying case for Touchscreen
13269C	Carrying case (for HP 150 and 9121 disc drive)
92160A	Thermal paper, blue print (box of 24 rolls)
92160B	Thermal paper, black print (box of 24 rolls)
92165A	2 plug surge suppressor
92165B	4 plug surge suppressor

92165C	6 plug surge suppressor
92171C	Keyboard drawer park
92171J	Large (extended) keyboard park
92171X	ThinkJet printer stand for top of display
92208A	Mobile PC Centre
92220R	Right-angle HP-IB cable (0.3 meters long)
92240A	Light-gray tilt unit
92240B	Light-gray swivel unit
92250F	Dust cover for 150
92250K	Dust cover for Touchscreen
92268A	4 metre StarLAN cable. 8-pin connected/4 twisted pair unshielded cable with RJ45 connectors
92268B	8 metre StarLAN cable. 8-pin connected/4 twisted pair unshielded cable with RJ45 connectors
92268C	16 metre StarLAN cable. 8-pin connected/4 twisted pair unshielded cable with RJ45 connectors
92268D	32 metre StarLAN cable. 8-pin connected/4 twisted pair unshielded cable with RJ45 connectors

■ **HP Vectra PC**

24542D	Parallel printer cable for the Vectra PC (2 meters)
24542G	Serial printer/plotter cable for the Vectra PC (3 meters)
24542H	Serial plotter cable for Vectra PC to 7550 plotter (3 meters)
24542M	U.S./European modem cable (3 meters) for the Vectra PC
35178A	Vectra PC three-piece carrying case
35188A	LaserPlotter software (allows laser to do plotter graphics)
35190J	LaserControl software (to drive LaserJet)
35190P	Jetplotter software (allows InkJet printers to be plotters)
92165A	Two outlet surge suppressor
92165B	Four outlet surge suppressor
92165C	Six outlet surge suppressor
45741A	Monochrome video extension cable
45742A	Color video extension cable
45986A	Security System Lock
92165A	2 plug surge suppressor
92165B	4 plug surge suppressor
92165C	6 plug surge suppressor
92171X	ThinkJet printer stand for top of display
92171Z	Vectra PC keyboard park
92190A	5.25-inch flexible discs, 360 KB formatted capacity (box of 10 discs)
92190X	High-capacity 5.25-inch flexible discs, 1.2 MB formatted capacity for use on the Vectra PC's high capacity internal disc drive (box of 10 discs)
92208A	Mobile PC Centre
92259A	Vectra PC dust cover for monochrome monitor and keyboard
92259B	Vectra PC dust cover for color monitor and keyboard
92268A	4 metre StarLAN cable. 8-pin connected/4 twisted pair unshielded cable with RJ45 connectors
92268B	8 metre StarLAN cable. 8-pin connected/4 twisted pair unshielded cable with RJ45 connectors

92268C	16 metre StarLAN cable. 8-pin connected/4 twisted pair unshielded cable with RJ45 connectors
92268D	32 metre StarLAN cable. 8-pin connected/4 twisted pair shielded cable with RJ45 connectors

---

#### For Disc Drives

##### ■ HP 82901M/S, 82902M/S, 9130A, 9135A 5.25-inch Disc Drives

92190A	5.25-inch flexible discs, double-sided (box of 10 discs)
92190L	5.25-inch flexible discs in Flex Files (box of 50 discs in Flex Files)
92190N	5.25-inch flexible discs (box of 100 discs)
92193K	5.25-inch flexible-disc drive-cleaning kit
92194N	5.25-inch rolltop file (capacity 120 discs)
92251A	Dust cover (82901M/S)
92251B	Dust cover (82902M/S)

##### ■ HP 9121D/S, 9133A/B, 9133V/XV, 9134 3.5-inch Disc Drives; 9114A/B, 9122D, 9122S, and 9133D Disc Drives

13269T	Disc-drive case for 9121
92191A	3.5-inch micro flex discs—single-sided (box of 10)
92192N	3.5-inch micro flex discs—double-sided (box of 100 discs)
92191D	3.5-inch micro flex disc desktop file (capacity 50)
92191H	3.5-inch micro flex disc album (capacity 20) (replaces 92191C)
92191R	3.5-inch micro flex disc roll-top file (capacity 50)
92192A	3.5-inch micro flex discs—double-sided (box of 10)
92251D	Dust cover (9121 D/S)

##### ■ HP 45812A Internal 1.2 Mb 5.25-inch Disc Drive for the Vectra PC

92190X	5.25-inch high capacity flexible disc (box of 10)
--------	---

##### ■ HP 45813A Internal 1.44Mb 3.5-inch Disc Drive for the Vectra PC

92192X	3.5-inch high density microflexible discs (box of 10)
--------	---

##### ■ HP 9142A Cartridge Tape Drive

92242L	600-foot data cartridge, 52 Mb formatted capacity (box of 5)
92242S	150-foot data cartridge, 15 Mb formatted capacity (box of 5)
92167F	Storage tray for 92242L/S tapes (holds up to 10 tapes)

##### ■ HP 9144A Cartridge Tape Drive

88140LC	600-foot formatted/certified data cartridge, 67Mb formatted capacity (box of 5)
88140SC	150-foot formatted/certified data cartridge, 16Mb formatted capacity (box of 5)
92167F	Storage tray for 88140LC/SC tapes (holds up to 10 tapes)

---

**For Printers****■ HP 3630A PaintJet Color Graphics Printer**

35190P	Jetplotter software (allows PaintJet to emulate plotter)
51606A	Black ink print cartridge
51606C	Color ink (cyan, magenta, yellow) print cartridge
51630P	Z-fold printer paper (250 sheets)
51630Q	Transparency film (50 sheets with sleeves)
51630Y	Cut-sheet printer paper (250 sheets)
92261G	Paper catcher for 92269A printer stand
92250Z	PaintJet printer dust cover
92269A	Desktop stand for PaintJet Printer

**■ HP 2225A/B/C/D ThinkJet Printer**

51605B	Individual printhead ink cartridge (blue)
51605G	Individual printhead ink cartridge (green)
51605R	Individual printhead ink cartridge (red)
35190P	Jetplotter software (allows ThinkJet Printer to emulate plotter)
51630A	Fan-fold ink jet paper (500 sheets/box)
51630J	Cut-sheet ink jet paper (500 sheets/box)
51630L	Pressure sensitive ink jet labels (2 across, 2000/box)
92171X	Terminal top ThinkJet printer stand for 239X series terminals
92250V	Dust cover
92261A	Individual printhead ink cartridge (black)
92261D	Accessory Kit (2 print heads, 500 sheets fanfold paper, 500 sheets cut paper, 1 dust cover, and 1 printer stand)
92261N	Fan-folded ink-jet paper (five 500-sheet packs)
92261R	Paper catcher for use with 92261S and 92171X stands
92261S	Desktop Thinkjet printer stand
13269TT	Carrying case

**■ HP 2227A/B QuietJet/QuietJet Plus**

51605B	Individual printhead ink cartridge (blue)
51605G	Individual printhead ink cartridge (green)
51605R	Individual printhead ink cartridge (red)
51630B	Z-fold wide paper for QuietJet Plus (500 sheets)
51630D	Z-fold wide paper for QuietJet plus (2500 sheets)
92250X	QuietJet dust cover
92250W	QuietJet Plus dust cover
92261A	Individual printhead ink cartridge (black)
92261G	Paper catcher for 92261T/U printer stand
92261P	QuietJet Plus accessory kit (1 each black, blue, green, and red printhead cartridges, printer stand, dust cover, printer paper)
92261T	QuietJet Plus printer stand
92261U	QuietJet printer stand
35190P	Jetplotter software (allows QuietJet to emulate ThinkJet Printer)

■ **HP 2235A/B/C/D RuggedWriter Printer**

92156S	Ribbon cartridges (box of 3 cartridges)
92166S	Desktop printer stand
92157A	Printer paper, fan-folded (box of 2400 sheets)
92157C	Printer paper, microperforated, fan-folded (box of 2400 sheets)

■ **HP 2932A/2934A Dot-Matrix Printer**

92154B	Print head
92155L	Ribbon cartridges (box of 3 cartridges)
92155M	OCR ribbon cartridge—for bar code applications (box of 3 cartridges)
92157A	Printer paper, fan-folded (box of 2400 sheets)
92157C	Printer paper, microperforated, fan-folded (box of 2400 sheets)
92211C	Mobile sound enclosure cabinet
92214P	Mobile printer stand

■ **HP 2686A LaserJet Printer**

35188A	LaserPlotter software (allows LaserJet to do full page plotter slides)
35190J	LaserControl software (to drive LaserJet)
92211B	Mobile printer cabinet
92215F	RS232C extension cable (15 meters)
92215T	RS232C extension cable (30 meters)
92219H	RS232C cable to HP 150 (5 meters)
92219J	RS232C cable to IBM PC (5 meters)
92285A	Toner (EP) cartridge—black
92285B	8.5" x 11" paper tray
92285C	8.5" x 14" paper tray
92285D	Metric A4-size paper tray
92285E	Metric B5-size paper tray
92285F	LaserJet forward collator
92285G	Toner (EP) cartridge—brown
92285P	Font Organizer

■ **HP 33440A LaserJet Series II Printer**

35188A	LaserPlotter software (allows Inkjet printers to be plotters)
35190J	LaserControl software (to drive LaserJet)
92211B	Mobile printer cabinet
92259G	Dust cover
92295A	Toner (EP-s) cartridge
92295B	8.5" x 11" paper tray (letter/standard size)
92295C	8.5" x 14" paper tray (legal size)
92295D	A4 paper tray (metric size)
92295E	7.25" x 10.5" paper tray (executive size)

■ **HP LaserJet/LaserJet Series II Printer Fonts**

92286A	Plug-in type-font cartridge (Courier and Line Printer, compressed)
92286B	Plug-in type-font cartridge (Proportional Spacing)
92286C	Plug-in type-font cartridge (International Courier)
92286D	Plug-in type-font cartridge (Prestige Elite)
92286E	Plug-in type-font cartridge (Letter Gothic)

92286F	Plug-in type-font cartridge (Proportional Spacing II)
92286G	Plug-in type-font cartridge (Legal Elite)
92286H	Plug-in type-font cartridge (Legal Courier)
92286J	Plug-in type-font cartridge (Math Elite)

92214P	Mobile support stand (7475)
92250N	Dust cover (7470A)
92269A	Desktop stand (7470A, ColorPro)

Hewlett-Packard personal business computers and their application programs are designed for ease of use and ease of learning. Classroom training courses can help first-time computer users rapidly build confidence and gain new skills in a supportive environment away from the day-to-day job.

**HP-Conducted  
Introductory Courses**

Hewlett-Packard provides Series 100 training courses at HP Customer Training Centers using HP-provided equipment; they can also be taught by HP at your facility using your own systems. To order, call your HP sales and service office.

■ *Getting Started—Vectra*

This class is designed to acquaint the novice Vectra PC user with the machine's many capabilities. Topics covered include installing applications, P.A.M., MS-DOS commands, disc formatting, file management, and system configuration.

HP 72401A (1 day)

■ *Getting Started—The Portable*

This class teaches new computer users to operate the Portable using P.A.M., to write and save a memo, and to dial an electronic information service. You will also gain an understanding of compatibility issues between desktops and The Portable.

HP 45689A (1 day)

■ *Getting Started—The Touchscreen*

This workshop was created especially for beginners—so your first experience with your new computer will be a positive one. You'll learn how to define basic computer terms, start up the system, handle discs properly, prepare new discs, and install application software.

HP 35036B (1 day)

This course, or equivalent knowledge, is a prerequisite for all applications and programming training on the HP 150.

---

**HP-Conducted  
Application Courses**

We have structured the curriculum for maximum flexibility. You can attend whatever functional area course you want—spreadsheet analysis, word processing, data base management, or integrated software—without having to go through material you are not interested in. For further efficiency, *WordStar/150* and *Condor/150* are each divided into two modules, allowing you to choose the depth of understanding you wish to attain.

All of these classes stress hands-on work with the HP 150 during class time for maximum effectiveness.

■ *Lotus 1-2-3*

This introductory workshop familiarizes you with the features, worksheet, and command structure of Lotus 1-2-3. Using hands-on practice, you will learn how to create and format a spreadsheet; save a worksheet and print a report; create and use a database; and create, print, and plot a graph.

HP 45688A (1 day)

■ *VisiCalc/150*

A solid introduction to the elements of a VisiCalc worksheet is provided in this workshop. Participants will learn to create, edit and print worksheets, identify and use 16 commands, activate the function keys, and store and load worksheets.

HP 35125A (1 day)

■ *WordStar®/150*

The WordStar® workshop will help you get started with word processing and its many capabilities. By the end of the workshop you will know how to start WordStar, create a new document, and then edit, save and print documents.

HP 35123B (1 day)

■ *MailMerge and SpellStar/150*

As a follow-on to WordStar, this workshop shows you how to merge files with MailMerge™ as well as proof your text using the SpellStar™ 20,000 word dictionary. In practice sessions, you will learn how to create a mailing list database and then combine this with text files to print customized letters and memos. The majority of WordStar's dot commands are explained and illustrated.

HP 35123C (½ day)

- *WordStar/150 and MailMerge/SpellStar/150* are available as a single unit.  
HP 35123A (1½ days)
  - *Condor/150 20-1 and 20-2*  
This workshop will introduce you to Condor™—an easy-to-use, yet powerful database management system. After you understand what a database system is you'll learn how to use one by designing a form for entering data, creating a simple dataset, editing information, sorting and creating simple reports, and reorganizing a dataset.  
HP 35124B (1 day)
  - *Condor/150 20-3*  
The Condor 20-3 workshop will provide you with in-depth experience using Condor's advanced database management and report writing capabilities including indexing a new or existing dataset, joining unlike datasets, creating, printing and revising reports, and creating and running a help screen and command procedure.  
HP 35124C (1 day)
  - *Condor/150 20-1 and 20-3* can be ordered as a single unit.  
HP 35124A (2 days)
- 
- *HP 150 Integrating Applications*  
Because you may use the same information in different ways, this workshop was created to teach you how to pass information from one software application to another. The following applications are covered: Condor, PCF, MailMerge, MemoMaker, SpellStar, Graphics, and WordStar.  
HP 35037A (½ day)
- 
- *Advanced Lotus 1-2-3*  
This class teaches Lotus 1-2-3 users advanced 1-2-3 features such as Data Sort, Data Query and Data Table commands, database statistical functions, keyboard macros, programming with the /X command, and advanced file commands.  
HP 05097A (1 day)

---

■ *MultiMate*

This class is designed for secretaries and clerks with little or no prior word processing experience. You will learn how to create, edit, format, and print documents.

HP 51400A (1 day)

---

■ *MS Word*

This class is designed for business professionals, word processing specialists and clerical personnel. You will learn to create, edit, format and print documents. In addition, you will learn to create multi-columnar documents, to set up glossaries and to understand the use of windowing.

HP 51401A (1 day)

---

■ *AdvanceWrite III*

This class is appropriate for all new users of AdvanceWrite. It covers all the major features of AdvanceWrite III, including creating and editing documents, producing customized letters, indices, tables of contents and glossary files, how to use spreadsheets in AdvanceWrite, and how to use the Wordbase Manager.

27501A (3 days)

---

**HP Customized Training**

These courses can be taught at your facility using your own systems—or training to suit your specific needs can be designed and given through HP's Personal Computer Applications Engineering Consulting Service. Contact your HP sales and service office for details.

---

**Dealer-Conducted Courses**

Many HP personal computer dealers teach similar courses or arrange for a Hewlett-Packard instructor to teach courses in your area. Contact your dealer for details.

---

The Classroom Learning Pack is a new concept expressly designed for the instructor of a classroom course on personal computer software. We've developed ready-to-use materials—an instructor's guide, overhead transparencies, and student activity sheets—so that you can quickly prepare for a course. And the course is easy to teach because the focus is on extensive hands-on practice with the software.

Classroom Learning Packs are offered for:

**Executive Card Manager/Vectra and IBM PC/XT/AT** ..... HP 89913F

**The Gallery Collection/Vectra and IBM PC/XT/AT** includes both Drawing and Charting Gallery and 1 Student Training Disc (CBT) ..... HP 68352V

Each course may be taught in approximately four hours. During most of this time the students will be actually using the software and the instructor will be serving as a coach, not a lecturer.

To help you prepare for your role in leading the class, each Classroom Learning Pack includes the corresponding HP FastTrak Guide for expert users. FastTrak is self-study, modular training on such topics as installation, configuration, demonstrations, software features, and integration with other software. You'll be well prepared to answer any questions that come up during class.

Not only will the students practice with the software, they'll also practice using the documentation that accompanies the product. After they leave the class they will be able to find valuable information in the manuals when they need it.

**Gallery Collection**

The focus of the Gallery Collection Learning Pack is intensive hands-on practice with the software. This is accomplished with instructor-guided exercises as well as self-instructional worksheets. One student training disc (CBT) is included with the Pack. CBT may also be used as self-paced training for an individual user at his/her workstation. A package of five training discs is available as product number 68351P. Topics covered include: using the Drawing Gallery discs and manuals; additional uses of Drawing Gallery; basic charting concepts, using the Charting Gallery manuals, and creating pie, bar, and line charts.

---

**Executive Card Manager**

The Executive Card Manager Learning Pack includes lessons on creating a cardfile; adding, updating and deleting cards; finding cards; and creating reports. This course may be used for teaching Executive Card Manager on the HP Vectra PC or an IBM PC/XT/AT.

---

**Ordering Information**

To order Classroom Learning Packs or Student Training Discs, contact your local dealer or HP office.

---

HP FastTrak is comprehensive self-study training for user support personnel and expert users. Developed for Hewlett-Packard support personnel, FastTrak guides are now available for any user that desires information beyond the scope of the software documentation.

If you provide support services for personal computer users in your organization, HP FastTrak will make your job easier by helping you learn the ins and outs of the software quickly. Topics covered in each guide include product overview, supported configurations, features and uses, demo tips, integration with other personal computer applications, installation, performance, and technical tips. And, FastTrak is completely modular so you can learn what you want, when you want.

FastTrak can help you provide several software services: product evaluation, installation, configuration, and user support. Experienced end-users will also appreciate a copy for handy reference. The format is consistent with the software documentation to simplify the learning process.

HP FastTrak guides are now available for five software applications:

**Executive MemoMaker** (HP 89915F)

**Executive Card Manager** (HP 89916F)

**AdvanceLink** (HP 89918F)

**Gallery Collection** (HP 68352X)

(includes Charting and Drawing Gallery FastTraks)

Each guide covers the Touchscreen/150 and Vectra versions of software. FastTrak for Executive MemoMaker, Executive Card Manager, and Gallery Collection also include diskettes—one in 3½" format and one in 5¼" format—of demonstration files.

If you desire technical user level information beyond the scope of the Microsoft Windows User's Guide, a Windows HP ExpertGuide is available. The **Windows HP ExpertGuide** is a self-study reference and learning tool composed of readings, labs, examples, and quick reference information for Windows on the HP 150 and Vectra. Microsoft Windows ExpertGuide—HP Part Number 5958-7685.

To order any of these products, contact your local dealer or sales office.

---

**The First Step  
Toward Effective  
Vectra Use**

**Vectra PC Fundamentals: A Computer-Based Tutorial** is a computer-based software package designed to introduce the new Vectra PC user to the system as well as to provide more in-depth lessons for the more experienced user. This tutorial is highly interactive and its modular format permits users to learn at their own pace and at their own convenience.

This computer-based tutorial is an ideal way to come up to speed on Vectra PC basics and to obtain efficiently the solid background necessary to be a productive applications user. Upon completion of the four-to-six hour tutorial, users will have gained:

- An understanding of basic microcomputer terms and concepts;
- An understanding of how to start and stop the Vectra PC;
- Experience in the use of the keyboard;
- An understanding of the components of the computer and their functions;
- The ability to differentiate between an operating system and application software;
- The ability to use PAM to perform basic file management and directory management tasks; and
- An ability to use sixteen of the most essential MS-DOS commands.

---

**To Order**

To order Vectra PC Fundamentals, contact your local dealer or sales office and request HP product number 51410A.

---

To order the personal computer software support that best meets your support requirements, call HP's Support Telemarketing Center at (800) 835-HPHP in the U.S. or call your local HP sales office. All contractual services must be purchased for a minimum of three months coverage. All PC software support services apply only to software classified as HP-supported. Listed below are some of the telephone assistance products.

---

**Telephone Assistance for Internal Support Personnel:**

**Workgroup Coordinator Assistance (HP 99062A + D00)** provides your centralized staff with comprehensive coverage for application software being used on various HP personal computer models.

---

**Telephone Assistance for the End-User:**

PC users receive unlimited call coverage for software supported on a specific HP personal computer model through **PC User Assistance:**

Vectra Publisher	HP 72496A + E00
Vectra Publisher EGA	HP 72497A + E00
Vectra Model 45	HP 72445A + E00
Vectra Model 50	HP 72450A + E00
Vectra Model 58	HP 72458A + E00
Vectra Model 59	HP 72459A + E00
Vectra Model 60	HP 72460A + E00
Vectra Industrial PC	HP 72411A + E00
Touchscreen MAX	HP 45660B + E00
Touchscreen II	HP 45851A + E00
Portable	HP 45710A + E00
Portable PLUS	HP 45711E + E00

---

**Per-call Services\* for Infrequent Support Needs:**

Individual support calls may be charged to personal or company credit cards by calling (800) 858-8867. In addition, users may prepay for five calls by purchasing HelpLine Call Certificate Packs (**HP 35159A**) from HP's Direct Marketing Division at (800) 538-8787.

\*Per-call services are available in the U.S. and Canada only.

## Ordering *HP PC Communicator* Back Issues

---

The application information, operational tips, and programming techniques included in the *HP PC Communicator* make back issues valuable—to increase your productivity and improve your system knowledge.

To order, refer to the “How to Order” section at the end of this insert.

Listed below are the major articles of the “white pages” of each issue. The Encyclopedia articles of past issues are listed in the Encyclopedia Index in this issue. There is no index for Newline and Bugline column items which appear in each issue.

---

### HP 120 and HP 125

Issues #1 through #6 cover primarily the HP 12x. (8½" x 11" page size)

#### **Issue #1 includes the following major articles:**

- “Single and Multi-line Page Headings with Word”
- “Searching for Enhanced Text in Word”
- “Making Invisible Characters Visible in Word”
- “Directory Scrolling in VisiCalc”
- “Sending Escape and Control Codes to a Printer from VisiCalc”
- “Warning: PASCAL”
- “Things You Should Know About Random Access Files”
- “HP 9895 to HP 9135 File Transfer”
- “Electronically Reading a Disc Reference Number”

*Series 100 Communicator* Issue #1 . . . . . 5955-3937

#### **Issue #2 includes the following major articles:**

- “Making Graphs from VisiCalc Worksheets”
- “Word and VisiCalc Go Together”
- “Printing Formulas from VisiCalc Worksheets”
- “Printing Multiple Copies From Word”
- “More on Search and Replace in Word”
- “Chaining from One Executable Program File to Another”
- “A BASIC Subroutine Library”
- “Sort and Back Up Operations with Large Data Bases”
- “Using COPY DISC to Back Up Data Files on Drive B”
- “Computing Internal Rate of Return in VisiCalc”

*Series 100 Communicator* Issue #2—U.S. . 5955-3943

*Series 100 Communicator* Issue #2—Intl. . 5955-3947

**Issue #3 includes the following major articles:**

- “Disc Formats on the HP Series 100”
- “Non-HP 12x CP/M Programs—Will They Run?”
- “Long Documents with Series 100/Word”
- “Series 100/Word: Y Table Gymnastics”
- “Using Graphics to Your Advantage”
- “Condor Tips”
- “Adding Your Application Program to the WELCOME Menu”
- “Using Softkeys on Non-HP Systems”
- “Changing Printer Characters”
- “Using The HP 2121 Disc Drive with Your HP 125A”

*Series 100 Communicator Issue #3* . . . . . 5957-6213

**Issue #4 includes the following major articles:**

- “International System Summary”
- “Condor News”
- “Comparing BPI and Peachtree Accounting”
- “Printing Mailing Labels from Condor”
- “More on HPMAIL and the Series 100”
- “File Transfers Using PIP”
- “Accessing a Plotter from BASIC”

*Series 100 Communicator Issue #4—U.S.* . 5957-6204

*Series 100 Communicator Issue #4—Intl.* . 5957-6214

**Issue #5 includes the following major articles:**

- “Enhanced Installation Program Available”
- “Video Display Interface for the HP 125”
- “Comparing Condor and dBASE II”
- “Sending Escape Codes to Printers from WordStar and Condor”
- “Interchangeability of Word and WordStar Text”
- “Two-Column Print in WordStar”
- “WordStar Quick Tips and Defaults”
- “Getting VisiCalc to Round Dollar Values to Two Places”
- “Word: Wandering HP 2601A Printer Margins with the Sheet Feeder”
- “DSN/Link: Enhanced File Transfer Capabilities over Link/125”
- “Connecting Two Series 100 Systems for ASCII File Transfer”
- “Transferring IMAGE/3000 Data to a Condor Database”
- “Transferring Data to the HP 2700 Color Graphics Terminal”
- “Installing the Operating System on Your Fixed Disc”

- “Using the HP 2631B HP-IB Printer with Series 100”
- “Programming Challenge—Bypassing WELCOME”

*Series 100 Communicator Issue #5—U.S. . 5957-6205*  
*Series 100 Communicator Issue #5—Intl. . 5957-6215*

**Issue #6 includes the following major articles:**

- “CSC Graphics Available on the Series 100”
- “New Auto Shutter for 3½ inch Micro Flexible Discs”
- “Introducing Enhanced DSN/Link”
- “Microsoft BASIC Compiler”
- “Using Block/Format on the Series 100”
- “Correction—Printing Mailing Labels From Condor”
- “WordStar/100 Multiple Column Print Update”
- “Remote Access to the HP 125”
- “Using the 92911A Bar Code Reader on the HP 125”
- “Configuring the Series 100 for use with the Diablo 630 Printer”
- “An Alternative to ALPHASORT for Series 100/Word”

*Series 100 Communicator Issue #6—U.S. . 5957-6206*  
*Series 100 Communicator Issue #6—Intl. . 5957-6216*

---

**HP 150 Touchscreen and HP 12x**

Issues #7 and #8 cover primarily the HP 150 Touchscreen and HP 12x. (5½" x 8½" page size)

**Issue #7 includes the following major articles:**

- “Transferring Files Between the HP 12x and HP 150”
- “Data Compatibility Between HP 12x and HP 150 Applications”
- “HP 12x: PIP, COPY, and BACKUP”
- “Comparing VisiCalc and MicroPlan”
- “WordStar Microspace Justification”
- “Configuring WordStar/150 for your Printer”
- “Condor Tips”
- “Correction: Remote Access to the HP 120/125”
- “BASIC/150: Block Mode Transfers”
- “HP 12x BASIC Compared to HP 150 BASIC”
- “Subtle Difference: HP 12x/150 BASIC and Other BASICS”

*Series 100 Communicator Issue #7—U.S. . 5957-6207*  
*Series 100 Communicator Issue #7—Intl. . 5957-6217*

**Issue #8 includes the following major articles:**

- “HP 150 Goes Worldwide”
- “HP 12x Fixed Disc Support Now Available”
- “Future Plans for the HP 120 and HP 125”
- “Using Plotters with the HP 150”
- “Installing dBASE II on the HP 150”
- “Three-Column Print in Word/12x”
- “Plotting Condor Data with HP Graphics”
- “Transferring Data Between a Series 100 Computer and an IBM PC”
- “Accessing Plotters from BASIC/150”
- “BASIC: How Do You Make RND More Random?”
- “Install Your BASIC/150 Application in PAM”
- “Decrease BASIC/150 Debugging Time with Cross Reference Utility

*Series 100 Communicator Issue #8. . . . . 5957-6218*

---

**Portable, HP 150  
Touchscreen, HP 12x**

Issues #9 and onward cover the Portable, HP 150 Touchscreen, and HP 12x. (5½" x 8½" page size)

**Issue #9 includes the following major articles:**

- “PIPPing Files on Your HP 12x”
- “From Numbers to Charts on the HP 150: dBASEII to Series 100 Graphics”
- “HP 150 Graphics: From the Screen to Your Printer”
- “Using Lotus/150 1-2-3 with the 7475A Plotter and B-size Paper”
- “Running Applications from MS-DOS on Your HP 150”
- “Word/12x: Rapid Returns”
- “Localizing Your HP 150”
- “Using Record Mode on the HP 150”
- “Escaping in High-Level Languages”
- “Access to the Touchscreen via MS-Pascal/150”
- “So You Want to Write Programs for the HP 150”
- “Introducing PFS:File and PFS:Report for the HP 150”
- “GraphPlan: New Integrated Spreadsheet and Graphics Software”

HP PC Communicator Issue #24 ..... 5958-7678

---

This section lists the software exchange kits available for The Portable, HP 120/125, Touchscreen/150, and HP Vectra PC. These kits contain the latest software and any manual updates issued since the original release.

**Exchange kits are provided at a nominal charge.** You return your original master disc as proof of purchase and continue operating as usual with your work copy of the software.

Software Exchange Kits are provided for several different purposes:

- **Updates.** Software is revised to add new features, to work with new peripherals, or to correct problems. You can update your program and manuals at a nominal cost by ordering the appropriate Software Exchange Kit.
- **Upgrades.** When major features are added to a software product, you can order a Software Exchange Kit at a low cost—"trading in" your older version for one with the latest capabilities and documentation.
- **Media Replacement.** The master-copy/work-copy technique used is designed to minimize the risk of damage to your master software due to handling or human error. If this happens, Software Exchange Kits are available at a nominal charge. If the product has been updated since your original purchase, the Exchange Kit contains the latest version and any manual updates issued since the original release.

---

**Ordering**

To order:

- In the U.S., Software Exchange Kits are available by mail from HP's Direct Marketing Division, using the form given later in this magazine.
- Outside the U.S., contact your dealer or HP sales office for details.

For each kit ordered, along with your payment submit one corresponding original master disc. This is the disc with the HP software product number and description printed on the label. **Be sure to make working copies before sending your master disc.**

**To determine the price for a kit**, contact your dealer or HP office—or call the HP telephone order number for your country. (See the “How to Order” section later in this Current Information insert.) HP cannot accept orders submitted without the correct master disc.

Refer to the tables on the next pages for Exchange Kit part numbers.

---

**HP Internal Orders**

For HP Internal Orders of Software Exchange Kits, return the original master discs to:

Software Administrator, Building 78/3  
or Hewlett-Packard  
Attn: Software Administrator  
P.O. Box 60008  
Sunnyvale, CA 94088

Reference your HP Internal Order number on the package.

---

**Replacement Media for Discontinued Software**

We are committed to sustain support for Hewlett-Packard products well after technology advances and market demand cause us to discontinue offering a product for sale.

It is HP corporate policy to ensure availability of parts and full support services for your computer for five years beyond discontinuance. Specifically, this means:

- Replacement Media Exchange Kits available for five years from date of last HP shipment, as indicated for each product in the “Discontinued Software” table in this section.
- Availability of telephone assistance through Hewlett-Packard Help Line Response Centers.
- Continuing coverage in this magazine—the *HP PC Communicator*. (By the way, you can help—share your tips and ideas with other users—just send a note to the *HP PC Communicator* editor.)

---

**Products Not Listed**

Because entertainment software packages are low-priced, there are no exchange kits for these products. Re-order the original product to replace damaged discs.

For information on other products not listed, contact your dealer or HP sales and service office.

\* Revised since original release

† For each kit ordered, along with your payment submit one corresponding original master disc. This is the disc with the HP software product number and description printed on the label. Be sure to make working copies before sending your master disc.

To determine the price for a kit, contact your dealer or HP office, or call the HP telephone order number for your country. (See the "How to Order" section later in this Current Information Insert.) Orders submitted without the correct master disc cannot be accepted. If you want a kit with 5.25" discs, please indicate this preference on your order. Otherwise 3.5" disc will be shipped, regardless of the size of your returned master disc.

#### Notes

- 1—Either a Condor 20-3 disc or a Condor-20-1-to-Condor-3 Upgrade disc can be exchanged for the Condor 3 disc.
- 2—Three double-sided discs, written in single-sided format, to exchange for damaged HP 150A or Touchscreen (HP 150B) media. To upgrade an HP 150A to the **Touchscreen (HP 150B)** operating system, order this kit. To update an HP 150A or Touchscreen to the **Touchscreen II** operating system, order the Touchscreen II Upgrade Kit (45849-63006) from your dealer or HP office. The upgrade kit includes the new operating system disc and the ROM integrated circuits required by the new disc; it is not user-installable. (Refer to the article "Upgrading Your HP 150A or Touchscreen to a Touchscreen II" in *Communicator* Issue #13 for details).
- 3—Double-sided exchange disc for damaged Touchscreen II media. To upgrade an HP 150A or Touchscreen (HP 150B) to the Touchscreen II operating system, order the Touchscreen II Upgrade Kit (45849-63006) from your dealer or HP office. The upgrade kit includes the new operating system disc and the ROM integrated circuits required by the new disc; it is not user-installable. (Refer to the article "Upgrading Your HP 150A or Touchscreen to a Touchscreen II" in *Communicator* Issue #13 for details.)

† For each kit ordered, along with your payment submit one corresponding original master disc. This is the disc with the HP software product number and description printed on the label. Be sure to make working copies before sending your master disc.

To determine the price for a kit, contact your dealer or HP office—or call the HP telephone order number for your country. (See the "How to Order" section later in this Current Information Insert.) Orders submitted without the correct master disc cannot be accepted.

**Notes**

3—This kit is to exchange your Link/125 disc for a Link/125 disc. (If you want to *upgrade* to Series 100 DSN/Link, order part number 45534-13810 or 45534-15810.)

4—A Condor 3 disc, a Condor 20-2 or 3 Upgrade disc, or a Condor 20-1 to 3 Upgrade disc may be exchanged for the Condor 3 disc.

5—A Condor 2 disc or a Condor 1 to 2 upgrade disc may be exchanged for the Condor 2 disc.

All of the items listed in this issue, except software update/upgrade kits and HP-conducted training courses, are available from your dealer or HP:

- Your local dealer can often provide immediate delivery. (To locate a dealer, call 800/FOR-HPPC in the U.S. or contact your local HP office—ask for “Personal Computer Dealer Sales.”)
- Your HP sales and service office will transmit your order to the appropriate HP distribution center.

**Ordering by Telephone from HP**

Except for systems, peripherals (such as disc drives and printers), and training courses, most items listed in this issue are also generally available by telephone from Hewlett-Packard:

For countries not listed, call your local HP sales and service office.

---

**Ordering HP-Conducted Training Courses**

Hewlett-Packard provides personal computer training courses at HP customer training centers using HP-provided equipment; they can also be taught by HP at your facility using your own systems. To order, call your HP sales and service office.

---

**Ordering Software Update and Upgrade Kits**

Your original master disc must accompany an order for software update or upgrade kits. Therefore, they are available only through your local dealer or from HP by mail.

For ordering instructions, refer to the article "Software Exchange Kits" elsewhere in this Current Information section.

---

**HP Internal Users**

Have your purchasing department enter an I2 order on the supplying entity shown for the item on the Corporate Price List or the Parts Price List. If you are ordering a software exchange kit, return the original master disc to:

Software Administrator/Internal Orders,  
Building 78/5

or to:

Hewlett-Packard  
P.O. Box 60008  
Sunnyvale, CA 94088  
Attn: Software Administrator/  
Internal Orders

Reference your HP internal order number on the package.

---

**HP Employees**

Check with the Employee Computer Program Coordinator in your personnel or purchasing department for ordering instructions.

## Ordering *HP PC Communicator* Subscriptions

---

The *HP PC Communicator* is the heart of the support program for The Portable, the HP 150 Touchscreen, the HP 12x, and the Vectra PC.

This publication contains articles on how to best use your system—plus each issue includes sections of the “HP PC Encyclopedia.”

The “HP PC Encyclopedia” brings together all the current information you need, in addition to the manuals, for each of the software packages that you use. New and revised Encyclopedia articles are sent to you as part of the *HP PC Communicator*.

You can order a subscription just as you order supplies and accessories—through your dealer, by using HP’s special telephone orderlines, or through your local HP office. (See the “How To Order” section in this insert for the special HP telephone number for your area.)

*HP PC Communicator*—  
U.S. . . . . 45530A  
*HP PC Communicator*—  
Canada/Mexico . . . . . 45530B  
*HP PC Communicator*—  
International . . . . . 45530C

(Subscriptions outside the U.S. are sent by accelerated mail.)

*Note: We are unable to start your subscription with an issue which has already been mailed; to complete your set of Communicator issues, order individual copies as described in the article “Ordering HP PC Communicator Back Issues” which is also in this Current Information section.*

---

### **Address Corrections for *HP PC Communicator* Subscribers**

Change the information on the mailing label by sending us the Change of Address form which appears at the end of this Current Information Insert. Allow six to eight weeks for the change to take effect.

---

### **HP Internal Users**

Have your purchasing department enter an I2 order on HP division A5 (DMK). For domestic orders only: Put users name in “Mark for” section.

---

### **HP Employees**

Check with the Employee Computer Program Coordinator in your personnel or purchasing department for Direct Marketing Division (DMK) ordering instructions.

---

# Mail Order Form

## for HP Personal/Desktop Computer Software Update Kits

Use this form only for HP Personal/Desktop Computer Software Update Kits. Supplies matched to your HP Computer System can be ordered with update kits.

Ordering instructions:

1. Print or type all requested customer information.
2. Order software update kit(s) for your HP Personal/Desktop Computer. The original disc must be sent to HP with your order for the software update kit; see instruction 7.
3. You may also order computer supplies using this form. Obtain current prices by calling toll-free 800-538-8787. In California, Alaska and Hawaii call (408) 738-4133 collect.
4. Compute state/local taxes on the total cost of items ordered (HP is required to collect taxes; their omission delays your order). If tax exempt, you must provide your tax exemption/resale number.
5. Fill in any special shipping instructions, as required. HP pays freight to U.S. addresses on mail orders, EXCEPT you will be charged extra for special expedited shipping methods; and you will be charged freight on heavy, bulky items weighing more than 30 lbs., such as furniture or printer paper.
6. Fill in credit card information or enclose cashier's check for fastest shipment. Payment by personal or company check will delay shipment up to 10 days. Make check payable to Hewlett-Packard Co. All orders subject to credit approval. **Do not send currency, coin, stamps or purchase orders.**

7. Before your software update kit(s) can be shipped, you must send with your order one original disc (containing the software being updated) for each update kit ordered. This is the disc with the HP software product number and description printed on the label. Be sure to make a working copy before sending the original.

8. Mail this form, along with credit card information (or check), and the original disc to:

HEWLETT-PACKARD DIRECT MARKETING  
Mail Order Dept., P.O. Box 60008, Sunnyvale, CA 94088

For carriers other than U.S. Mail, the address is:

HEWLETT-PACKARD DIRECT MARKETING  
Mail Order Dept., 1320 Kifer Road, Sunnyvale, CA 94086
